Special Educational

Needs and Inclusive Practices Fabio Dovigo, 2017-01-28 Today school is becoming a rapidly changing learning environment Thinking about students as a homogeneous population is no longer allowed as diversity in terms of culture language gender family organisation learning styles and so on has emerged as a key challenge for education today The debate on Special Educational Needs largely reflects this challenge as working in school implies careful reconsideration of what we mean by normal and special Current educational intervention is generally based on a deficit and within child model of facing SEN whereas very little attention is given to the role of learning environments The focus is on the child more than on the whole class and on cognition and technical provisions more than on affective sociocultural and community dimensions of learning Conversely regarding students and their needs as hidden voices allows us to adopt a transformative approach which sees diversity as a stimulus for the development of educational practices that might benefit all children and help school to become an inclusive and moving organisation The aim of the book is twofold on the one hand it offers a systematic overview of the inclusive education state of the art in six countries Germany Italy Norway Sweden UK and USA based on the contributions by well known scholars such as Christy Ashby Barbara Brokamp Fabio Dovigo Kari Nes Mara Westling Allodi Tony Booth and Beth Ferri on the other hand the book analyses five cases of good practices of inclusion related to different subjects and school levels

Asia's Latent Nuclear Powers Mark Fitzpatrick,2017-10-03 If the nuclear weapons club were to further expand would Americas democratic allies in Northeast Asia be among the next entrants Japan South Korea and Taiwan all have robust civilian nuclear energy programmes that make them virtual nuclear powers according to many analysts All three once pursued nuclear weapons and all face growing security threats from nuclear armed adversaries But will they or rather under what circumstances might they This book analyses these past nuclear pursuits and current proliferation drivers In explaining the nuclear technology that the three now possess it considers how long it would take each to build a nuclear weapon if such a fateful decision were made Although nuclear dominoes Northeast Asia cannot be ruled out the author does not predict such a scenario Unlike when each previously went down a nuclear path democracy and a free press now prevail as barriers to building nukes in the basement Reliance on US defence commitments is a better security alternative as long as such guarantees remain credible an issue that is also assessed But extended deterrence is not a tight barrier to proliferation of sensitive nuclear technologies Nuclear hedging by its Northeast Asian partners will challenge Washingtons nuclear diplomacy

Reduce, Reuse, Reimagine Beth Porter,2018-11-15 Ecosystems require balance to survive and when that balance is compromised disaster can befall the whole system To keep a balance in our global ecosystem we need to use resources efficiently equitably and sustainably In both nature and economics we observe that when a healthy distribution of resources is achieved systems can not only function but flourish The United States recycles roughly 34% of its waste and has been stuck at this level for decades Recycling brings a balance to our system by managing resources in a loop When done well it benefits communities and the environment Individuals are a key part of connecting this loop because we provide a supply of materials and a demand for new recycled products But many of us don t know what happens after those items leave our homes We re confused by inconsistent rules of what we can and can t recycle Our confusion has huge consequences and is a reason why our recycling is stuck Throughout Reduce Reuse Reimagine Beth Porter provides answers to clear up that confusion and shares great resources about recycling explaining the complexity

guiding individual action and contextualizing its history This book reveals how we arrived at this state of dysfunction and what steps we need to employ to be an active participant in strengthening our recycling system Nature knows how to recycle itself decomposing waste back into the soil to continue the circle of growth We should follow its lead
