(2) The inequality is strict.</p>	<p>What does the open circle tell you about the inequality $x + 2 < 4$ and the region shaded red? (3) The inequality is strict.</p>

Graph these inequalities using a number line.

1) $2x + 3 < 7$ or $-5x < 10$

Number line: $x_1 = 2x + 3 < 7$

Number line: $x_2 = -5x < 10$

Inequality: $x_1 = 2x + 3 < 7$ or $x_2 = -5x < 10$

Solution:

$$x < 2 \text{ or } x < -2$$

2) $2 < 3x < 12$ or $3x < 7$ or $2 < 3x$

Number line: $x_1 = 2 < 3x < 12$

Number line: $x_2 = 3x < 7$

Inequality: $x_1 = 2 < 3x < 12$ or $x_2 = 3x < 7$ or $x_3 = 2 < 3x$

Solution:

$$x < 7/3$$

3) $3x + 4 < 10$ or $-2x < 10$ or $3x + 4 < 10$

Number line: $x_1 = 3x + 4 < 10$

Number line: $x_2 = -2x < 10$

Inequality: $x_1 = 3x + 4 < 10$ or $x_2 = -2x < 10$ or $x_3 = 3x + 4 < 10$

Solution:

$$x < 2$$

Teaching Secondary and Middle School Mathematics Daniel J. Brahier, 2020-04-01 Teaching Secondary and Middle School Mathematics combines the latest developments in research technology and standards with a vibrant writing style to help teachers prepare for the excitement and challenges of teaching secondary and middle school mathematics. The book explores the mathematics teaching profession by examining the processes of planning teaching and assessing student progress through practical examples and recommendations. Beginning with an examination of what it means to teach and learn mathematics, the reader is led through the essential components of teaching, concluding with an examination of how teachers continue with professional development throughout their careers. Hundreds of citations are used to support the ideas presented in the text, and specific websites and other resources are presented for future study by the reader. Classroom scenarios are presented to engage the reader in thinking through specific challenges that are common in mathematics classrooms. The sixth edition has been updated and expanded with particular emphasis on the latest technology resources and standards. The reader is introduced to the ways that students think and how to best meet their needs through planning that involves attention to differentiation as well as how to manage a classroom for success. Features include: The entire text has been reorganized so that assessment takes a more central role in planning and teaching. Unit 3 of 5 now addresses the use of summative and formative assessments to inform classroom teaching practices. A new feature, Links and Resources, has been added to each of the 13 chapters. While the book includes a substantial listing of citations and resources after the chapters, five strongly recommended and practical resources are spotlighted at the end of each chapter as an easy reference to some of the most important materials on the topic. Approximately 150 new citations have either replaced or been added to the text to reflect the latest in research materials and resources that support the teaching of mathematics. A Quick Reference Guide has been added to the front of the book to assist the reader in identifying the most useful chapter features by topic. A significant revision to Chapter 13 now includes discussions of common teaching assessments used for field experiences and licensure as well as a discussion of practical suggestions for success in methods and student teaching experiences. Chapter 9 on the practical use of classroom technology has been revised to reflect the latest tools available to classroom teachers, including apps that can be run on handheld personal devices. An updated Instructor's Manual features a test bank, sample classroom activities, Powerpoint slides, chapter summaries, and learning outcomes for each chapter and can be accessed by instructors online at www.routledge.com/9780367146511. [Math Wars](#) Carmen Latterell, 2004-12-30 This book is written for parents and other interested parties so that they can understand the great debate taking place in many states in this country about how to teach basic math The debate centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are concerned about their children s math learning Teachers are concerned about math teaching When parents see what children are

bringing home under the new curriculum it is clear that their children are not working on the same mathematics that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary mathematics courses are the fear of many students The standards created by the NCTM do not necessarily prepare students for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for parents to do anything about the confusing state of mathematics education This book provides some answers **Addressing the**
