School Management and Effectiveness in Developing Countries Clive Harber, Lynn Davies, 2006-02-08 This book is quite different from existing Western books on school effectiveness It describes and analyses the way in which schools operate in developing countries

and also tries to explain why they are as they are Examining them at three levels the macro the meso and the micro the authors use a theoretical framework that they have termed post bureaucracy The book has four interlinked sections First the authors examine the existing economic and theoretical contexts around school effectiveness including an analysis of the causes of economic crisis and its impact on school management In the second section the analysis of schools as bureaucratic facades is proposed The reality of school life from which any theory of school effectiveness must derive is illustrated by an ethnographic account of the job of the headteacher in developing countries The third section explores different ways to understand this reality operating on three levels global relationships national and community cultures and individual agency In the final section Haber and Davies draw these levels and realities together They argue for the democratization of schools as the only way forward for effective education for development
