guide for a healthier trimmer you *Jordan's Journey* Jordan M. Scoggins, 2012-01-23 *Jordan's Journey* is something new to the world of ancestry. It's a genealogical mashup incorporating photography, writing, design, research, and more. Gone are the boring register reports and dry descriptions found in genealogical tomes of old. This book takes a new approach, fusing together the creative and academic in a way that breathes new life into family history. Equal parts genealogical memoir, art photography, and local history, *Jordan's Journey* pulls you in with a rich and immersive experience. With more than 75 original photos by the author, as well as over 150 vintage images, *Jordan's Journey* invites you on a trip into the rural south of yesteryear. The book traces the major family lines of Pope, Jordan, Scoggins, and Holcomb, along with the associated families of Clement, Love, Robbs, Goodson, Visin, and Whisenant, Anderson, Chapman, Lawrence, Rambo, Hawkins, Ward, Keown, and Cavender. Other allied families are discussed, as well as the general local history of the Armuchee Valley region of northwest Georgia.

Continuing the Journey to Reposition Culture and Cultural Context in Evaluation Theory and Practice Stafford Hood, Rodney Hopson, Henry Frierson, 2014-12-01 Racial, ethnic, linguistic, and cultural diversity has become of global importance in places where many never would have imagined. Increasing diversity in the U.S., Europe, Africa, New Zealand, and Asia strongly suggests that a homogeneity-based focus is rapidly becoming an historical artifact. Therefore, culturally responsive evaluation (CRE) should no longer be viewed as a luxury or an option in our work as evaluators. The continued amplification of racial, ethnic, linguistic, and cultural diversity and awareness among the populations of the U.S. and other western nations insists that social science researchers and evaluators inextricably engage culturally responsive approaches in their work. It is unacceptable for most mainstream university evaluation programs, philanthropic agencies, training institutes sponsored by federal agencies, professional associations, and other entities to promote professional evaluation practices that do not attend to CRE. Our global demographics are a reality that can be appropriately described and studied within the context of complexity theory and theory of change, e.g., Stewart 1991, Battram 1999. And this perspective requires a distinct shift from simple linear cause-effect models and reductionist thinking to include more holistic and culturally responsive approaches. The development of policy that is meaningfully responsive to the needs of traditionally disenfranchised stakeholders and that also optimizes the use of limited resources (human, natural, and financial) is an extremely complex process. Fortunately, we are presently witnessing developments in methods, instruments, and statistical techniques that are mixed methods in their paradigm designs and likely to be more effective in informing policymaking and decision making. Culturally responsive evaluation is one such phenomenon that positions itself to be relevant in the context of dynamic international and national settings where policy and program decisions take place. One example of a response to address this dynamic and need is the newly established Center for Culturally Responsive Evaluation and Assessment (CREA) in the College of Education at the University of Illinois at Urbana-Champaign. CREA is an outgrowth of the collective work and commitments of a global community of scholars and practitioners who have contributed chapters to this edited volume. It is

an international and interdisciplinary evaluation center that is grounded in the need for designing and conducting evaluations and assessments that embody cognitive cultural and interdisciplinary diversity so as to be actively responsive to culturally diverse communities and their aspirations The Center s purpose is to address questions issues theories and practices related to CRE and culturally responsive educational assessment Therefore CREA can serve as a vehicle for our continuing discourse on culture and cultural context in evaluation and also as a point of dissemination for not only the work that is included in this edited volume but for the subsequent work it will encourage

The Evolutionary Journey of Amino Acids François Blachier, 2025-06-24 This book takes readers on a journey from the very fundamental and chemical beginnings of amino acids on Earth to their role in human metabolism It provides background on how amino acid metabolism has changed across the evolutionary tree and discusses their physico-chemical properties as well as their biochemical roles across various forms of life Amino acids are emerging as key players in numerous physiological functions and are being increasingly recognized as playing a mechanistic role for the communication between the gut microbiota and the host in healthy state and in some pathophysiological situations However understanding these associations requires a multidisciplinary approach combining chemistry biochemistry physiology nutrition molecular cellular biology and microbiology This book aims to describe the science behind amino acids from their first appearance and evolutionary significance all the way through the tree of life to humans and then to consider how gut microbial amino acid metabolism regulates human physiology and risk in some chronic diseases It covers key concepts such as the characteristics of different amino acids found in living organisms their existence in the pre-living world and their vital roles in metabolism and physiology It also explores intriguing questions about microbial communication and the effect of amino acid derived microbial metabolites on mammalian cells With this multidisciplinary approach and accessible structure this book will appeal not only to students and researchers with a background in biochemistry and related fields but also to non-specialists with an interest in the foundations of life at the intersection of evolutionary biology and metabolism

Ambivalent Journey Richard C. Jones, 2022-09-13 The changing political and economic relationships between Mexico and the United States and the concurrent U.S. debate over immigration policy and practice demand new data on migration and its

economic effects In this innovative study Richard C Jones analyzes migration patterns from two subregions of north central Mexico Coahuila and Zacatecas to the United States He analyzes and contrasts the characteristics of the two migrant populations and interprets the economic impacts of migration upon both home of migration upon both home areas Jones s findings refute some common assumptions about Mexican migration while providing a strong model for further research Jones s study focuses on the ways in which U S migration affects the lives of families in these two subregions Migrants from Zacatecas have traditionally come from rural areas and have gone to California and Illinois Migrants from Coahuila on the other hand usually come from urban areas and have almost exclusively preferred locations in nearby Texas The different motivations of both groups for migrating and the different economic and social effects upon their home areas realized by migrating form the core of this book The comparison also lends the book its uniqueness since no other study has made such an in depth comparison of two areas Jones addresses the basic dichotomy of structuralists who maintain that dependency and disinvestment are the rule for families and communities in sending areas and functionalists who believe that autonomy and reinvestment are the case of migrants and their families in home regions Jones finds that much of the primary literature is based on uneven and largely outdated data that leans heavily on two sending states Jalisco and Michoacan His fresh analysis shows that communities and regions of Mexico rather than families only account for differing migration patterns and differing social and economic results of these patterns Jones s study will be of value not only to scholars and practitioners working in the field of Mexican migration but also for its innovative methodology to anthropologists sociologists political scientists and historians whose interests include human migration patterns in any part of the world
