10. Does each variable at least have two categories? (If not, delete the variable.)

2.2. The three-dimensional visualization of group-theoretical coefficients helps to formulate several new theorems, open analogues of the original results in combinatorial mathematics, and the representation significantly helps to find the minimum response time of a subject (group-theoretical coefficients of the corresponding group).

12. How does the rate of change in the labor supply, as a function of the wage rate, compare with the logarithmic distribution in the economic system?
