Mathematical Modelling: From Theory To Practice Ngan Hoe Lee, Kit Ee Dawn Ng, 2015-01-19 This book documents the journey undertaken by educators from the Mathematics and Mathematics Education MME Academic Group in the National Institute of Education NIE and Singapore schools during a Mathematical Modelling Outreach MMO event in June 2010 under the guidance of renowned experts in the field of mathematical modelling The main goal of MMO was to reach out to Singapore primary and secondary schools and introduce the potentials of mathematical modelling as a platform for eliciting mathematical thinking communication and reasoning among students This book contributes to the expanding literature on mathematical modelling by offering voices from the

Singaporean context It suggests how theoretical perspectives on mathematical modelling can be transformed into actual practice in schools all within the existing infrastructure of the current Singapore mathematics curriculum More importantly the book provides documentary evidence on how plans put in place through MMO in 2010 have since been realised The publication of this book is hence timely at this juncture Not only does the book record how MMO was among the first pebbles launched into the pond it also serves as a bridge over which educators can stand upon to view how the ripple effect had developed from the initial MMO pebble and the directions it may continue to extend Perhaps in the process other ripples in the teaching learning and research of mathematical modelling can be created

International Practices to Promote Budget Literacy Harika Masud,Helene Pfeil,Sanjay Agarwal,Alfredo Gonzalez

Briseno,2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government s fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case

that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI *Sustainability Science* Per Becker,2014-07-23 A new holistic transdisciplinary endeavour born in the 21st century Sustainability Science Managing Risk and Resilience for Sustainable Development aims to provide conceptual and practical approaches to sustainable development that help us to grasp and address uncertainty complexity ambiguity and dynamic change Four aspects that permeate our contemporary world and undermine much of our traditional ways of thinking and doing The concepts of risk and resilience are central in this endeavour to explain understand and improve core challenges of humankind Sustainability and sustainable development are increasingly important guiding principles across administrative levels functional sectors and scientific disciplines Policymakers practitioners and academics continue to wrestle with the complexity of risk resilience and sustainability but because of the necessary transdisciplinary focus it is difficult to find authoritative content in a single source Sustainability Science Managing Risk and Resilience for Sustainable Development presents the state of the world in relation to major sustainability challenges and their symptomatic effects such as climate change environmental degradation poverty disease and disasters It then continues by elaborating on ways to approach and change our world to make it a safer and more sustainable place for current and future generations The natural applied and social sciences are woven together throughout the book to provide a more inclusive understanding of relevant processes changes trends and events Shows how disturbances disruptions and disasters have always been intrinsic byproducts of the same human environment systems that supply us with opportunities as well as what implications that has for policy and practice towards sustainable development today Introduces a new approach for grasping and addressing issues of risk and resilience in relation to sustainable development that is firmly rooted in a comprehensive philosophical and theoretical foundation and clearly linking the conceptual with the practical Presents a holistic agenda for change that

includes a more explicit role of science reinforced focus on capacity development and the overall necessity of fundamental social change Features more than 150 figures full color photographs diagrams and illustrations to highlight major themes and aid in the retention of key concepts *Gender differences and disparities in socialization contexts: How do they matter for healthy relationships, wellbeing, and achievement-related outcomes?* Caterina Fiorilli, Daniela Barni, Jan Retelsdorf, Joyce Endendijk, 2023-01-05
