Forestry and Planning Division Ljungman et al 1999 find that forest resources continue to diminish while being called upon to produce a greater range of goods and services and that calls for sustainable forest management will simply go unheeded if the legal policy and administrative environment do not effectively control undesirable practices Does the concept of sustainable forest management represent not much more than a magic formula for achieving consensus a vague idea which makes it difficult to match action to rhetoric The concept of sustainable forest management is likely to remain an imprecise one but we can contribute to avoiding management practices that are clearly unsustainable
