Livestock Ration Formulation for Dairy Cattle and Buffalo Ravinder Singh Kuntal, Radha Gupta, D. Rajendran, Vishal Patil, 2022-04-22. Livestock Ration Formulation for Dairy Cattle and Buffalo provides an interdisciplinary integrative perspective and optimization on dairy cattle feed formulation problem solving. It helps dairy farmers by introducing them the right frequency and right amount of balanced diet to be fed to cattle and buffaloes at different body conditions so that their feeding cost should be decreased and there should be an increase in income for dairy farmers as they don't have enough knowledge of feeding practice. It helps animal nutritionists to work for dairy farmers which have very limited feed resources to fulfil nutrients requirement in terms of crude protein (CP), total digestible nutrient (TDN), calcium (Ca) and phosphorus (P) by developing a software programme to plan a balanced low budget diet. It includes the Linear and Goal programming model for non-pregnant dairy buffalo, which has been solved using Hybrid Real Coded

Genetic Algorithm and the results are compared with Real Coded Genetic Algorithm RGA considering different versions like RGA without crossover RGA without Mutation RGA with crossover and mutation These models can also be applied with other nutritional models like CNCPS INRA This book is a step forward in that direction to provide least cost diet formulation based on nutrient requirement of the cattle and buffalo which is been calculated according to Indian Council of Agricultural Research ICAR 2013 and NRC 2001 on dry matter basis provides a clear and precise platform for other researcher in Animal Nutrition field which also give initial platform to build a software and android application to formulate least cost ration Based on data and algorithm used in this book which helps Dairy farmers directly to feed balanced diet at cheap rate Features It is a good reference to local dairy farmers by introducing them to the right frequency and right amount of balanced diet to be fed to cattle and buffaloes at different production cycles It will provide basic platform and some solutions to built up software about cattle nutrition development and least cost formulation for end user It has several techniques for optimizing animal diet formulation but a good balance between coding programming and animal nutrition is incorporated towards application of soft computing technique to improve the quality of the solution due to rigidity of the constraints Geomechanics and Geodynamics of Rock Masses - Volume 2 Vladimir Litvinenko,2018-05-20 This book is Volume 2 of the EUROCK 2018 proceedings Geomechanics and Geodynamics of Rock Masses contains contributions presented at EUROCK 2018 the 2018 International Symposium of the International Society for Rock Mechanics ISRM 2018 Saint Petersburg Russia 22 26 May 2018 Dedicated to recent advances and achievements in the fields of geomechanics and geotechnology the main topics of the book include Physical and mechanical properties of fractured rock laboratory testing and rock properties field measurements and site investigations Geophysics in rock mechanics Rock mass strength and failure Nonlinear problems in rock mechanics Effect of joint water on the behavior of rock foundation Numerical modeling and back analysis Mineral resources development methods and rock mechanics problems Rock mechanics and underground construction in mining hydropower industry and civil engineering Rock mechanics in petroleum engineering Geodynamics and monitoring of rock mass behavior Risks and hazards Geomechanics of technogenic deposits Geomechanics and Geodynamics of Rock Masses will be of interest to researchers and professionals involved in the various branches of rock mechanics and rock engineering EUROCK 2018 organized by the Saint Petersburg Mining University is a continuation of the successful series of ISRM symposia in Europe which began in 1992 in Chester UK **Geomechanics and Geodynamics of Rock Masses** Vladimir Litvinenko,2018-05-15 Geomechanics and Geodynamics of Rock Masses contains contributions presented at EUROCK 2018 the 2018 International Symposium of the International Society for Rock Mechanics ISRM 2018 Saint Petersburg Russia 22 26 May 2018 Dedicated to recent advances and achievements in the fields of geomechanics and geotechnology the main topics of the book include Physical and mechanical properties of fractured rock laboratory testing and rock properties field measurements and site investigations Geophysics in rock mechanics Rock mass strength and failure Nonlinear problems in rock mechanics Effect of
