Robson, 2012-09-20 Sir William Lyons enjoyed a seemingly unstoppable rise to fame and fortune in the motor industry and the Jaguar brand that he introduced became world famous. Yet it did not happen overnight. In the 1920s he was in Blackpool styling motorcycle sidecars and in the 1930s in Coventry developing the SS motor car with the stand-alone Jaguar company not appearing until 1945. The company's success was aided by the amazing new XK engine of 1948 by motor racing success at Le Mans and by the stunning styling of cars like the XK120, the Mk 2 saloons and the extraordinary E-Type. Graham Robson here explores the history of the Jaguar company and its many classic marques.

Fuzzy Logic for Planning and Decision Making Freerk A. Lootsma, 2013-03-14 This book starts with the basic concepts of Fuzzy Logic: the membership function, the intersection and the union of fuzzy sets, fuzzy numbers and the extension principle underlying the algorithmic operations. Several chapters are devoted to applications of Fuzzy Logic in Operations Research: PERT planning with uncertain activity durations, Multi-Criteria Decision Analysis (MCDA) with vague preferential statements and Multi-Objective Optimization (MOO) with weighted degrees of satisfaction. New items are Fuzzy PERT using activity durations with triangular membership functions, Fuzzy SMART with a sensitivity analysis based upon Fuzzy Logic, the Additive and the Multiplicative AHP with a similar feature, ELECTRE using the ideas of the AHP and SMART and a comparative study of the ideal point methods for MOO. Finally, earlier studies of colour perception illustrate the attempts to find a physiological basis for the set-theoretical and the algorithmic operations in Fuzzy Logic. The last chapter also discusses some key issues in linguistic categorization and the prospects of Fuzzy Logic as a multi-disciplinary research activity. Audience: Researchers and students working in applied mathematics, operations research, management science, business administration, econometrics, industrial engineering, information systems, artificial intelligence, mathematical psychology and psychophysics. *16th International Technical Conference on the Enhanced Safety of Vehicles*, 1998
