Perspectives on Consumer Choice Gordon R. Foxall, 2016-10-11 Evaluating the ways in which we construe consumer choice this book examines the psychology methods and realities of the role it plays for today's consumer. Confronted by competing brands and products, services and tailored opportunities that are but a click away, how does the consumer choose among them to achieve the particular array of goods to suit their lifestyle? Consumer researchers often seek to explain consumer choice by attributing it to beliefs, desires, attitudes and intentions in the absence of any theoretical justification. *Perspectives on Consumer Choice* is the outcome of a research program that employs cognitive explanations in a responsible and disciplined way to genuinely elucidate consumer choice in social scientific terms. Employing a reasoned approach to understanding consumption, this book builds upon theoretical and empirical research in economic psychology, behavioral economics and philosophy as well as marketing and consumer research.

Jungian Music Psychotherapy Joel Kroeker, 2019-04-26 Music is everywhere in our lives and all analysts are witness to musical symbols arising from their patient's psyche. However, there is a common resistance to working directly with musical content. Combining a wide range of clinical vignettes with analytic theory, Kroeker takes an in-depth look at the psychoanalytic process through the lens of musical expression and puts forward an approach to working with musical symbols within analysis which he calls Archetypal Music Psychotherapy. AMP. Kroeker argues that we have lost our connection to the simple, vital immediacy that musical expression offers. By distilling music into its basic archetypal elements, he illustrates how to rediscover our place in this confrontation with deep psyche and highlights the role of the enigmatic musical psyche for guiding us through our life. Innovative and interdisciplinary, Kroeker's model for working analytically with musical symbols enables readers to harness the impact of meaningful sound, allowing them to view these experiences through the clarifying lens of depth psychology and the wider work of contemporary psychoanalytic theory. *Jungian Music Psychotherapy* is a groundbreaking introduction to the ideas of Archetypal Music Psychotherapy that interweaves theory with clinical examples. It is essential reading for Jungian analysts, psychotherapists, psychoanalysts, music therapists, academics and students of Jungian and post-Jungian studies, music studies, consciousness studies and those interested in the creative arts.

Adolescents In The Internet Age, 2nd Edition Paris S. Strom, Robert D. Strom, 2014-07-01 Teaching adolescents and learning from them is the paradigm elaborated throughout this second edition of *Adolescents in the Internet Age* The premise is based upon four assumptions 1 Adolescents have unique experiences that qualify them as the most credible source on what growing up is like in the current environment 2 Adolescents are more competent than many adults with tools of technology that will be needed for learning in the future 3 Adolescents and adults can support mutual development by adopting the concept of reciprocal learning and 4 The common quest of adolescents to gain adult identity could be attained before employment Expectations are the theme for every chapter The reason expectations are so important is because they influence goals determine priorities and are used to evaluate progress and achievements of individuals and institutions When teacher expectations correspond with the abilities and interests of students achievement and satisfaction are common outcomes In contrast if teachers expect too little student potential can be undermined There is also concern if expectations that students have for themselves surpass their abilities This occurs if teachers do not inform students about their deficits Multitasking doing too many things at the same time detracts from productivity Sharing accountability depends upon complimentary and attainable expectations that can be met by students teachers and parents To support appropriate expectations this book for secondary teachers and high school students seeking a broader understanding of their own generation is organized in four parts about aspects of learning and development 1 Identity expectations introduce traditional perspectives on adolescence changes related to sources of learning evolving emphasis of schools and ways to support motivation goal setting and formation of identity 2 Cognitive expectations examine mental abilities academic standards emergence of the Internet as a learning tool development of media literacy creative problem solving and encouragement of higher order thinking skills 3 Social expectations explore the need for giving greater attention to social development importance of teamwork skills involvement with social networking adoption of civil behavior school safety and values as a basis for ethical behavior and character 4 Health expectations center on decisions that influence physical health well being and lifestyle choice Consideration is given to stress management emotional intelligence and risk assessment strategies for individual teenagers and the schools that they attend
