FCC Record United States. Federal Communications Commission, 2012 *Examining how Technology Can Promote Consumer Financial Literacy* United States. Congress. House. Committee on Financial Services. Subcommittee on Financial Institutions and Consumer Credit, 2014 **Who Should Pay?** Natasha Quadlin, Brian Powell, 2022-01-14 Americans now obtain college degrees at a higher rate than at any time in recent decades in the hopes of improving their career prospects At the same time the rising costs of an undergraduate education have increased dramatically forcing students and families to take out often unmanageable levels of student debt The cumulative amount of student debt reached nearly 1.5 trillion in 2017 and calls for student loan forgiveness have gained momentum Yet public policy to address college affordability has been mixed While some policymakers support more public funding to broaden educational access others oppose this expansion Noting that public opinion often shapes public policy sociologists Natasha Quadlin and Brian Powell examine public opinion on who should shoulder the increasing costs of higher education and why *Who Should Pay* draws on a decade's worth of public opinion surveys analyzing public attitudes about whether parents students or the government should be primarily responsible for funding higher education Quadlin and Powell find that between 2010 and 2019 public opinion has shifted dramatically in favor of more government funding In 2010 Americans overwhelmingly believed that parents and students were responsible for the costs of higher education Less than a decade later the percentage of Americans who believed that federal or state local government should be the primary financial contributor has more than doubled The authors contend that the rapidity of this change may be due to the effects of the 2008 financial crisis and the growing awareness of the social and economic costs of high levels of student debt Quadlin and Powell also find increased public endorsement of shared responsibility between individuals and the government in paying for higher education The authors additionally examine attitudes on the accessibility of college for all whether higher education at public universities should be free and whether college is worth the costs Quadlin and Powell also explore why Americans hold these beliefs They identify individualistic and collectivist world views that shape public perspectives on the questions of funding accessibility and worthiness of college Those with more individualistic orientations believed parents and students should pay for college and that if students want to attend college then they should work hard and find ways to achieve their goals Those with collectivist orientations believed in a model of shared responsibility one in which the government takes a greater level of responsibility for funding education while acknowledging the social and economic barriers to obtaining a college degree for many students The authors find that these belief systems differ among socio demographic groups and that bias sometimes unconscious and sometimes deliberate regarding race and class affects responses from both individualistic and collectivist oriented participants Public opinion is typically very slow to change Yet *Who Should Pay* provides an illuminating account of just how quickly public opinion has shifted regarding the responsibility of paying for a college education and its implications for future generations of students

Higher Education Jaclyn M. Morelli, 2010 *Intro to Failure* William Pacwa, 2020-08-12 The American higher education system is broken Colleges and universities are shifting far from their roots as centers for academic scholarship into pools of adult infants who barely mature and are provoked by the slightest non conforming opinions Their inefficiency is setting students up to fail wasting students time and providing little in return These institutions are now the hub for propagating modern indentured servitude by bestowing the youth thousands of dollars in unscrupulous student loan debt Instead of an atmosphere of intellectual curiosity the campus culture is saturated with promiscuity binge drinking and partying Increasingly common college students experience depression anxiety and physical abasement as a result of this environment A majority of incoming freshmen are now going to college to prolong adolescence rather than to progress upright into adulthood American higher education is a crumbling spectacle where the level of education the value of the degree and the overall prestige are quickly deteriorating Arguably the university system is now doing more harm than good Those who enter the supposed golden gates of higher education are not getting the positive return on investment of past generations Why has the higher education system changed so little in such a time of major transformation in the access to information through the internet How can it cost so much more and take just as long to complete a standard bachelor s degree What are the main failures plaguing colleges and universities And what is the future for coming generations for those aspiring to gain an education This book sets out to find answers to the aforementioned questions William Pacwa graduated from a four year university in only two years at the age of 19 during the spring of 2020 Throughout this time in university he witnessed structural flaws in the American higher education system The goal of his book is to clearly articulate those problems and give concise solutions to rectify the inadequacies for the betterment of future generations And for those who still want or are required to attend university he uncovers the factors that allow students to complete their degree with speed and efficiency saving incoming students time and money **On the Philosophy of Higher Education** John S.

What's College For? Zachary Karabell, 1998-09-10 A hard hitting examination of the current crisis in higher education and an urgent call for major reform Unequal Higher Education Barrett J. Taylor, Brendan Cantwell, 2019-05-03 American higher education is often understood as a vehicle for social advancement However the institutions at which students enroll differ widely from one another Some enjoy tremendous endowment savings and or collect resources via research which then

offsets the funds that students contribute Other institutions rely heavily on student tuition payments These schools may struggle to remain solvent and their students often bear the lion s share of educational costs Unequal Higher Education identifies and explains the sources of stratification that differentiate colleges and universities in the United States Barrett J Taylor and Brendan Cantwell use quantitative analysis to map the contours of this system They then explain the mechanisms that sustain it and illustrate the ways in which rising institutional inequality has limited individual opportunity especially for students of color and low income individuals Higher Education Association of Professors of Higher Education,1974 A Current View of Higher Education Clint Vogus,2014-07-11 The financial crisis of 2008 and the resultant global economic recession has resulted in a more challenging job market and lower real incomes for many Americans These conditions are bringing to the forefront a broad based national discussion about higher education Students future students as well as parents educators recent college graduates and public officials are asking more questions about the value of higher education relative to its costs and its outcomes Some of these questions Include Why has the cost of higher education increased much more than inflation over the past several decades Are future higher education costs expected to continue to rise at the same rate What are the long term social and economic effects of the increasing student loan debt which is now approaching 1 2 trillion Why are so many recent college graduates having difficulty finding good paying jobs Why is the U S falling behind other countries in higher educational achievement while spending much more per student Is a college education necessary to earn a good living and lead a fulfilling life Are there some alternatives to going to college What is the primary purpose of higher education What college should I attend Does it matter Are online courses and programs a good way to earn a college degree Can I go to college without incurring student loan debt These and other questions are being asked more often and by a broader range of people as our global economy continues to make the transition from one of decades of high growth to likely decades of more moderate growth *Higher Education....* United States. Office of Education. Higher education division,1945 Just Ask! Dennis Black,1992 Diversity and Competition Council for Financial Aid to Education,1954 **Higher Education** Committee on Higher Education,1963 *The Idea of Higher Education* Ronald Barnett,1990 Despite an increasing volume of talk about and a growing literature on higher education very little of it asks the question what in essence is higher education The tradition of overarching thinking about higher education from Newman onwards has almost vanished The debate has focused instead on technical administrative financial and narrow academic concerns and the terms of discussion have been framed by concepts such as efficiency unit costs access and the needs of industry none of which focus on higher education as such There is therefore a need for the aims of higher education to be restated in modern terms This book explores such concepts as culture rationality research and academic freedom it aims to provide a new approach to educational theory embracing debates in social theory philosophy of social science critical theory sociology of education and sociology of knowledge It aims to give an account of the idea of higher education draw out

the practical implications and propose specific strategies for realizing a liberal higher education New Dimensions in Higher Education ,1960 **Purposes and the performance of higher education** Carneige Commission on the Future of Higher Education, **Planning For Higher Education** Allan O.
