

Rationale for the Direction of the Distributed Real-Time Specification for Java

Panel Position Paper

E. Douglas Jensen

The MITRE Corporation

jensen@real-time.org, <http://www.real-time.org>

The Distributed Real-Time Specification for Java (DRTSJ) is being developed by the JSR-90 Expert Group in Sun's Java Community Process. The Expert Group is led by The MITRE Corporation, and includes approximately 20 other member enterprises – from academia, the U.S. government, and industrial corporations in the defense, telecommunications, industrial automation fields.

The terms “distributed,” “real-time,” and “distributed real-time” are employed for so many disparate kinds of computer systems, that the Expert Group deemed it unlikely that any single DRTSJ could do justice to them all. Therefore, the intended target space of “distributed real-time” systems had to be at least roughly delineated for both the Expert Group and the prospective DRTSJ users. This position paper synthesizes some of the rationale for the Expert Group's focus.

For the purpose of the DRTSJ, the term *distributed system* informally refers to a computing system whose programming model is based on there being application-level entities that exhibit multi-node behaviors.

In real-time distributed computing systems, multi-node application behaviors may have end-to-end time constraints. The defining characteristic of any real-time distributed computing system, whatever its programming model, is that the timeliness (optimality and predictability of optimality) of each multi-node application behavior – on each individual node it involves, and collectively end-to-end on all nodes it currently involves – is acceptable to that application under the current circumstances.

The “current circumstances” include the latency characteristics of the underlying infrastructure (node OS's, network), the attributes of the system load, etc. All those circumstances are known and controlled *a priori* in static distributed real-time computing systems, notably including hard real-time ones. But in general, not all of those circumstances are (or can be) known and controlled *a priori* – the system is *dynamic* to the degree that is the case.

The Real-Time Specification for Java is oriented toward

dynamic (non-static) systems, although it has been proven to successfully support static hard real-time computing. Similarly, the DRTSJ is oriented toward the general case of dynamic distributed real-time computing systems, although we expect it to also be capable of supporting the special case of static hard real-time ones.

In most cases, the extent to which end-to-end multi-node timeliness can be achieved depends on the extent to which each multi-node application behavior's timeliness properties – e.g., end-to-end time constraints, expected execution time, execution time received thus far, etc. – are explicitly employed for appropriately coherent resource management (particularly scheduling) on each node currently involved in that application multi-node behavior. Ideally, that includes scheduling of other sequentially shared hardware resources, notably the network connecting those nodes, and software ones as well, notably synchronizers (e.g., locks).

Thus (in dynamic distributed real-time computing systems) these properties need to be propagated among corresponding computing node resource managers in operating systems, JVM's, middleware, and even (directly or indirectly) device – e.g., network, storage – controllers. Acquiring, propagating, depositing, and employing this information should be done transparently to the application programmers; indeed, often some of this information is not even accessible by the application programmers.

There are many different kinds of distributed systems. However, the vast majority of deployed distributed real-time computing systems employ at least one of the following programming models:

- *control flow*: movement of an execution point, with or without parameters, among application entities – e.g., remote procedure call (RPC) and remote method invocation (RMI)
- *data flow*: movement of data, without an execution point, among application entities – e.g., publish/subscribe and bulk data transfers
- *networked*: asynchronous or synchronous movement of messages, without an execution point, among application entities – e.g., message passing IPC

Ieee Java Papers

Ieee Java Papers:

TELECOMMUNICATION SYSTEMS AND TECHNOLOGIES-Volume II Paolo Bellavista, 2009-10-17 Telecommunication Systems and Technologies theme is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Telecommunication systems are emerging as the most important infrastructure asset to enable business economic opportunities information distribution culture dissemination and cross fertilization and social relationships As any crucial infrastructure its design exploitation maintenance and evolution require multi faceted know how and multi disciplinary vision skills The theme is structured in four main topics Fundamentals of Communication and Telecommunication Networks Telecommunication Technologies Management of Telecommunication Systems Services Cross Layer Organizational Aspects of Telecommunications which are then expanded into multiple subtopics each as a chapter These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs *South African Institute of Computer Scientists and Information Technologists* Aurna Gerber, Marijke Coetzee, 2023-07-29 This book contains a selection of the best papers of the 44th Annual Conference SAICSIT 2023 held in Pretoria South Africa in July 2023 The 18 papers presented in this volume were carefully reviewed and selected from 54 regular submissions They adress various aspects of the role of computer science in connectivity information systems for connectivity connecting society and emerging technologies for connectivity **2024-25 RPSC Programmer Solved Papers and Practice Book** YCT Expert Team , 2024 25 RPSC Programmer Solved Papers and Practice Book 160 295 E This book contains practice book and covers paper I and Paper II

The Practical Handbook of Internet Computing Munindar P. Singh, 2004-09-29 The Practical Handbook of Internet Computing analyzes a broad array of technologies and concerns related to the Internet including corporate intranets Fresh and insightful articles by recognized experts address the key challenges facing Internet users designers integrators and policymakers In addition to discussing major applications it also covers the architectures enabling technologies software utilities and engineering techniques that are necessary to conduct distributed computing and take advantage of Web based services The Handbook provides practical advice based upon experience standards and theory It examines all aspects of Internet computing in wide area and enterprise settings ranging from innovative applications to systems and utilities enabling technologies and engineering and management Content includes articles that explore the components that make Internet computing work including storage servers and other systems and utilities Additional articles examine the technologies and structures that support the Internet such as directory services agents and policies The volume also discusses the multidimensional aspects of Internet applications including mobility collaboration and pervasive computing It concludes with an examination of the Internet as a holistic entity with considerations of privacy and law combined with

technical content **Software Similarity and Classification** Silvio Cesare, Yang Xiang, 2012-03-03 Software similarity and classification is an emerging topic with wide applications. It is applicable to the areas of malware detection, software theft detection, plagiarism detection, and software clone detection. Extracting program features, processing those features into suitable representations, and constructing distance metrics to define similarity and dissimilarity are the key methods to identify software variants, clones, derivatives, and classes of software. *Software Similarity and Classification* reviews the literature of those core concepts in addition to relevant literature in each application and demonstrates that considering these applied problems as a similarity and classification problem enables techniques to be shared between areas. Additionally, the authors present in-depth case studies using the software similarity and classification techniques developed throughout the book.

Handbook of Internet Computing Borko Furht, 2019-07-23 Scientists in different geographical locations conduct real-time experiments in a virtual shared workspace. E-commerce provides an emerging market for businesses large and small. E-mail, Servers, and Enterprise Resources Planning have revolutionized businesses on every level. People from all over the globe gather in chat rooms. The Internet is here to stay, and Internet technologies and applications continue to grow and evolve. *The Handbook of Internet Computing* presents comprehensive coverage of all technical issues related to the Internet and its applications. It addresses hot topics such as Internet architectures, content-based multimedia retrieval on the Internet, Web-based collaboration, Web search engines, digital libraries, and more. Real-life examples illustrate the concepts so that technical, non-technical, and business people can quickly grasp the fundamentals.

Handbook of Software Engineering Sungdeok Cha, Richard N. Taylor, Kyochul Kang, 2019-02-11 This handbook provides a unique and in-depth survey of the current state of the art in software engineering, covering its major topics, the conceptual genealogy of each subfield, and discussing future research directions. Subjects include foundational areas of software engineering, e.g., software processes, requirements engineering, software architecture, software testing, formal methods, software maintenance, as well as emerging areas, e.g., self-adaptive systems, software engineering in the cloud, coordination technology. Each chapter includes an introduction to central concepts and principles, a guided tour of seminal papers and key contributions, and promising future research directions. The authors of the individual chapters are all acknowledged experts in their field and include many who have pioneered the techniques and technologies discussed. Readers will find an authoritative and concise review of each subject and will also learn how software engineering technologies have evolved and are likely to develop in the years to come. This book will be especially useful for researchers who are new to software engineering and for practitioners seeking to enhance their skills and knowledge.

[Introduction to Network Security](#) Douglas Jacobson, 2008-11-18 Unlike data communications of the past, today's networks consist of numerous devices that handle the data as it passes from the sender to the receiver. However, security concerns are frequently raised in circumstances where interconnected computers use a network not controlled by any one entity or organization.

Handbook of

Real-Time and Embedded Systems Insup Lee, Joseph Y-T. Leung, Sang H. Son, 2007-07-23 Real time and embedded systems are essential to our lives from controlling car engines and regulating traffic lights to monitoring plane takeoffs and landings to providing up to the minute stock quotes Bringing together researchers from both academia and industry the Handbook of Real Time and Embedded Systems provides comprehensive coverage *Selected Papers of the International Workshop on Smalltalk Technologies* Michael Haupt, 2010 The goal of the IWST workshop series is to create and foster a forum around advancements of or experience in Smalltalk The workshop welcomes contributions to all aspects theoretical as well as practical of Smalltalk related topics

Distributed, Embedded and Real-time Java Systems M. Teresa Higuera-Toledano, Andy J. Wellings, 2012-02-07 Research on real time Java technology has been prolific over the past decade leading to a large number of corresponding hardware and software solutions and frameworks for distributed and embedded real time Java systems This book is aimed primarily at researchers in real time embedded systems particularly those who wish to understand the current state of the art in using Java in this domain Much of the work in real time distributed embedded and real time Java has focused on the Real time Specification for Java RTSJ as the underlying base technology and consequently many of the Chapters in this book address issues with or solve problems using this framework Describes innovative techniques in scheduling memory management quality of service and communication systems supporting real time Java applications Includes coverage of multiprocessor embedded systems and parallel programming Discusses state of the art resource management for embedded systems including Java's real time garbage collection and parallel collectors Considers hardware support for the execution of Java programs including how programs can interact with functional accelerators Includes coverage of Safety Critical Java for development of safety critical embedded systems

Secure Smart Embedded Devices, Platforms and Applications Konstantinos Markantonakis, Keith Mayes, 2013-09-14 New generations of IT users are increasingly abstracted from the underlying devices and platforms that provide and safeguard their services As a result they may have little awareness that they are critically dependent on the embedded security devices that are becoming pervasive in daily modern life Secure Smart Embedded Devices Platforms and Applications provides a broad overview of the many security and practical issues of embedded devices tokens and their operation systems platforms and main applications It also addresses a diverse range of industry government initiatives and considerations while focusing strongly on technical and practical security issues The benefits and pitfalls of developing and deploying applications that rely on embedded systems and their security functionality are presented A sufficient level of technical detail to support embedded systems is provided throughout the text although the book is quite readable for those seeking awareness through an initial overview of the topics This edited volume benefits from the contributions of industry and academic experts and helps provide a cross discipline overview of the security and practical issues for embedded systems tokens and platforms It is an ideal complement to the earlier work Smart Cards Tokens Security and Applications from the same editors

Intelligent Agents for

Telecommunication Applications Sahin Albayrak,2003-07-31 The first international workshop on Intelligent Agents for Telecommunications Applications IATA 96 was held in July 1996 in Budapest during the XII European Conference on Artificial Intelligence ECAI 96 The workshop program consisted of technical presentations addressing agent based solutions in areas such as network architecture network management and telematic services Presentations gave rise to a lively debate on the advantages and difficulties of incorporating agent technology in telecommunications The proceedings were published by IOS Press providing introductory papers on agent technology as well as telecom applications and services and also papers about appropriate languages and development tools The second International Workshop IATA 98 was held in Paris in the framework of Agents World which brought together the principal scientific and technical events on agent technology such as the International Conference on Multi Agent Systems ICMAS 98 RoboCup 98 devoted to an international competition between soccer playing robot teams and six international workshops Each workshop focused on specific aspects of agent technology such as databases and information discovery on the Internet CIA 98 Collective Robotics CRW 98 Simulation MABS 98 Agent Theories Architectures and Languages ATAL 98 Communityware ACW 98 and Telecommunications Applications IATA 98 The proceedings of IATA 98 were published by Springer Verlag

Mobile Agents in Networking and Distributed Computing Jiannong Cao,Sajal Kumar Das,2012-07-31 The book focuses on mobile agents which are computer programs that can autonomously migrate between network sites This text introduces the concepts and principles of mobile agents provides an overview of mobile agent technology and focuses on applications in networking and distributed computing

Handbook of Research on Big Data Storage and Visualization Techniques Segall, Richard S.,Cook, Jeffrey S.,2018-01-05 The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries Challenges associated with the analysis security sharing storage and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data The Handbook of Research on Big Data Storage and Visualization Techniques is a critical scholarly resource that explores big data analytics and technologies and their role in developing a broad understanding of issues pertaining to the use of big data in multidisciplinary fields Featuring coverage on a broad range of topics such as architecture patterns programing systems and computational energy this publication is geared towards professionals researchers and students seeking current research and application topics on the subject

Handbook of Research on Scalable Computing Technologies Li, Kuan-Ching,Hsu, Ching-Hsien,Yang, Laurence Tianruo,Dongarra, Jack,Zima, Hans,2009-07-31 This book presents discusses shares ideas results and experiences on the recent important advances and future challenges on enabling technologies for achieving higher performance Provided by publisher

Proceedings of the IEEE. Institute of Electrical and Electronics Engineers,1925 Vols 34 include section Waves and electrons

Internet of Things S. Velliangiri,Sathish A.P. Kumar,P. Karthikeyan,2020-12-29 IoT is empowered by

various technologies used to detect gather store act process transmit oversee and examine information The combination of emergent technologies for information processing and distributed security such as Cloud computing Artificial intelligence and Blockchain brings new challenges in addressing distributed security methods that form the foundation of improved and eventually entirely new products and services As systems interact with each other it is essential to have an agreed interoperability standard which is safe and valid This book aims at providing an introduction by illustrating state of the art security challenges and threats in IoT and the latest developments in IoT with Cloud AI and Blockchain security challenges Various application case studies from domains such as science engineering and healthcare are introduced along with their architecture and how they leverage various technologies Cloud AI and Blockchain This book provides a comprehensive guide to researchers and students to design IoT integrated AI Cloud and Blockchain projects and to have an overview of the next generation challenges that may arise in the coming years

Ubiquitous Health and Medical Informatics: The Ubiquity 2.0 Trend and Beyond Mohammed, Sabah, Fiaidhi, Jinan, 2010-04-30 This book is specific to the field of medical informatics and ubiquitous health care and highlights the use of new trends based on the new initiatives of Web 2.0 Provided by publisher

Index of Conference Proceedings British Library. Document Supply Centre, 2003

Right here, we have countless ebook **Ieee Java Papers** and collections to check out. We additionally provide variant types and also type of the books to browse. The suitable book, fiction, history, novel, scientific research, as well as various additional sorts of books are readily understandable here.

As this Ieee Java Papers, it ends occurring brute one of the favored book Ieee Java Papers collections that we have. This is why you remain in the best website to look the unbelievable book to have.

Ieee Java Papers Introduction

Ieee Java Papers Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Ieee Java Papers Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Ieee Java Papers : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Ieee Java Papers : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Ieee Java Papers Offers a diverse range of free eBooks across various genres. Ieee Java Papers Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Ieee Java Papers Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Ieee Java Papers, especially related to Ieee Java Papers, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Ieee Java Papers, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Ieee Java Papers books or magazines might include. Look for these in online stores or libraries. Remember that while Ieee Java Papers, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Ieee Java Papers eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Ieee Java Papers full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Ieee Java Papers eBooks, including some popular titles.

FAQs About Ieee Java Papers Books

1. Where can I buy Ieee Java Papers books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Ieee Java Papers book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Ieee Java Papers books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Ieee Java Papers audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Ieee Java Papers books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
