It now features new examples taken from recent developments such as laser slowing of atoms, exoplanets, and black holes. A Hints, Clues, and Answers section for the end of chapter problems to support student learning, and a solutions manual for instructors at www.cambridge.org/kandk.

The Publishers' Trade List Annual, 1985 **Readings in Qualitative Reasoning About Physical Systems** Daniel S. Weld, Johan De Kleer, 2013-09-17 *Readings in Qualitative Reasoning about Physical Systems* describes the automated reasoning about the physical world using qualitative representations. This text is divided into nine chapters, each focusing on some aspect of qualitative physics. The first chapter deals with qualitative physics, which is concerned with representing and reasoning about the physical world. The goal of qualitative physics is to capture both the commonsense knowledge of the person on the street and the tacit knowledge underlying the quantitative knowledge used by engineers and scientists. The succeeding chapter discusses the qualitative calculus and its role in constructing an environment that includes behavior over both mythical time and elapsed time. These topics are followed by reviews of the mathematical aspects of qualitative reasoning, history-based simulation, and temporal reasoning, as well as the intelligence in scientific computing. The final chapters are devoted to automated modeling for qualitative reasoning and causal explanations of behavior. These chapters also examine the qualitative kinematics of reasoning about shape and space. This book will prove useful to psychologists and psychiatrists. **Proceedings of the Conference**, 1977 *Books in Print*, 1977 **Scientific and Technical Books and Serials in Print**, 1989 *IJCAI-77*, 1977 *IJCAI*, 1977 *National Union Catalog*, 1982 Includes entries for maps and atlases. *Technical Books in Print*, 1974 **Solutions Manual to Accompany an Introduction to Mechanics** Daniel Kleppner, Robert J.
