Model Tests and Numerical Simulations of Liquefaction and Lateral Spreading Bruce L. Kutter, Majid T. Manzari, Mourad Zeghal, 2019-11-15 This open access book presents work collected through the Liquefaction Experiments and Analysis Projects LEAP in 2017 It addresses the repeatability variability and sensitivity of lateral spreading observed in twenty four centrifuge model tests on mildly sloping liquefiable sand The centrifuge tests were conducted at nine different centrifuge facilities around the world For the first time a sufficient number of experiments were conducted to enable assessment of variability of centrifuge test results The experimental data provided a unique basis for assessing the capabilities of twelve different simulation platforms for numerical simulation of soil liquefaction The results of the experiments and the numerical simulations are presented and discussed in papers submitted by the project participants The work presented in this book was followed by LEAP Asia that included assessment of a generalized scaling law and culminated in a workshop in Osaka Japan in March 2019 LEAP 2020 ongoing at the time of printing is addressing the validation of soil structure interaction analyses of retaining walls involving a liquefiable soil A workshop is planned at RPI USA in 2020

Introduction to Audiovisual Archives Peter Stockinger, 2013-02-07 Today audiovisual archives and libraries have become very popular especially in the field of collecting preserving and transmitting cultural heritage However the data from these archives or libraries videos images sound tracks etc constitute as such only potential cognitive resources for a given public or target community They have to undergo more or less significant qualitative transformations in order to become user or community relevant intellectual goods These qualitative transformations are performed through a series of concrete operations such as audiovisual text segmentation content description and indexing

pragmatic profiling translation etc These and other operations constitute what we call the semiotic turn in dealing with digital audiovisual texts corpora of texts or even entire audiovisual archives and libraries They demonstrate practically and theoretically the well known from data to meta data or from simple information to relevant knowledge problem a problem that obviously directly influences the effective use the social impact and relevancy and therefore also the future of digital knowledge archives It constitutes indeed the heart of a diversity of important R D programs and projects all over the world
