Learning Critical Reflection Laura Béres, Jan Fook, 2019-08-13

Learning Critical Reflection documents the actual learning experiences of social work students and practitioners. It explores how a more in depth understanding of the process of learning combined with an analysis of how to critically reflect will help improve the learning process. The contributors are all professionals who have learnt in a formalised way how to critically reflect on their practice. They speak in depth and with feeling about their experiences how downsides and upsides worked together to transform the way they understood themselves their professional identity and their practice. Existing literature about critical reflection is reviewed identifying the details of learning and pulling no punches in recognising the difficulty and complexity of becoming transformed through this learning process. The editors of this book also contribute their own reflections on learning how to teach critical reflection and include the findings of a research study conducted on students learning. Edited by two experienced educators this book showcases the process of learning from the perspective of the learners in order that educators and students managers supervisors and frontline practitioners alike may make the most of opportunities to critically reflect in both educational and workplace settings. It should be considered essential reading for social work students practitioners and educators.

**The Role of Reflection in Managerial Learning** Marilyn W. Daudelin, Kent W. Seibert, 1999-09-30 Challenging work experiences are the richest source of learning for today's managers. Yet lessons embedded in these experiences are not always obvious. This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection. Today's workplace demands continual learning which in turn requires reflection. While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers. Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive. Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection. Both modes involve processes of intentional inquiry. Different forces are necessary to stimulate each type of reflection. Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes. Accordingly a holistic model that integrates active and proactive reflection is presented. This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection. It

is also relevant to practitioners and companies who desire to enhance what their managers learn from their workplace experience
