Student and Parent Friendly Tutorial Guide to 4th and 5th Grade Math Donna M. Mosch Craft Murdock, 2014-04
Donna M Mosch Craft Murdock retired in 2008 after teaching for 38 years in grades 4-6. As a graduate of Elmira College her first 17 years were spent teaching in Elmira NY for the Rochester Diocese the remaining time was in Williamsburg VA. During this time she took numerous courses from Shenandoah University and the College of William and Mary. She retired from York County School Division where she taught 5th grade. Her notes that she gave her math students the basis for this book have helped her many students excel on their 5th grade math SOL Standard of Learning test. Daily Routines to Jump-Start Geometry, Measurement, and Data, Grades K-5 John J. SanGiovanni, Dennis McDonald, 2025-06-03
Geometry, measurement, and data aren't just math topics; they're fundamental skills for understanding the world around us. Geometry, measurement, and data concepts play a major role in everyday life. Yet when it comes to teaching math in the elementary grades, these concepts can be overshadowed by other content like number concepts, computation, or fractions. Instead, what if these ideas about measurement, geometry, and data were connected to number and computation? What if they were featured content for bursts of engagement, reasoning, and discussion? The bite-sized routines in this guide are just that. The routines in this book are perfect for teachers looking for interesting and doable daily practice that engage students in geometry, measurement, and data to foster reasoning, critical thinking, and sense-making. Daily Routines to Jump Start Geometry Measurement and Data Grades K-5 provides routines that are practical, easy to implement, and meant for quick engagements to ignite thinking and reasoning skills while being adaptable to various content. Fortified with standards for math practices and processes, this book provides a collection of 20 routines with extensions and modifications for measurement, data, and geometry. Includes a detailed example for each routine on why it matters, the challenges it addresses, and how to facilitate it in the classroom. Offers guidance for selecting and introducing routines, as well as how to design your own routines. Helps you integrate the geometry, measurement, and data concepts earlier in the school year and can complement any curriculum or textbook program. Features bonus activities that infuse money and time. Extends learning through a companion website that includes each routine as a downloadable and an editable set of PowerPoint slides that provides templates for making your own examples. By implementing these daily routines, you can not only enhance your students' understanding and engagement in geometry, measurement, and data but also foster a deeper connection between math and the real world. **Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 8** Jo Boaler, Jen Munson, Cathy Williams, 2019-12-23
Engage students in mathematics using growth mindset techniques. The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low-floor, high-ceiling tasks that will help you do just that by looking at the big ideas at the eighth grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen

Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum *Simple Graph Art* Erling Freeberg,1987-06
