Construction Manual for Polymers + Membranes

Jan Knippers, Jan Cremers, Markus Gabler, Julian Lienhard, 2012-12-17 Whether it be as translucent sheets broadly stretched membranes and inflated foil cushions or in graceful organic curves architecture today is utilizing plastics in the most disparate forms and for a wide variety of purposes Innovative technical developments are constantly improving its material

properties at the same time there is a growing new awareness of its potential as a construction material While plastics used to be employed primarily as an inexpensive variant on traditional building materials they are increasingly regarded in the construction world today as a serious and viable alternative be it as supporting structures roofs facades or elements of interior design and decoration Thanks in large part to this inherent self sufficiency plastics are currently enjoying an unprecedented surge in popularity even among the international architectural avant garde as multiwall sheets or corrugated fiber reinforced panels or as filling between glass panes And the new generation of ecological bioplastics also pays tribute to the debate on sustainability ridding plastics of their lingering reputation as environmental offenders From the history of plastics and membranes in architecture to their material properties and requirements in construction and design the *Plastics and Membranes Construction Manual* cuts to the chase providing the kind of solid and comprehensive overview of the subject that readers have come to expect from the Im DETAIL series Selected project examples round off the reference work and make it indispensable for the day to day life of the professional planner and for every architecture library *Modern Construction Case Studies* Andrew Watts, 2019-06-17 *Modern Construction Case Studies* focuses on the interface between the design of facades structures and environments of 12 building projects all developed by Newtecnic The Author compares facade technologies particularly in the way they interface with structure and MEP mechanical electrical plumbing services in complex projects to provide insights into the design process for building envelopes Each envelope technology is described with an emphasis on one of three aspects geometry construction and performance The analysis links the 12 case studies by comparing their structural and environmental performance The aim is achieved by analyzing typical bays which are representative of each project and which illustrate the implications of using different building envelope technologies
