Hall, Donald E. Meyer, James F. Parker, 1967      The Complete Book of the SR-71 Blackbird Richard H. Graham, 2015-10-26 The ultimate guide to the history development manufacture modification and active service of all fifty models in the SR 71 program At the height of the Cold War in 1964 President Johnson announced a new aircraft dedicated to strategic reconnaissance The Lockheed SR 71

Blackbird spy plane flew more than three and a half times the speed of sound so fast that no other aircraft could catch it. Above 80,000 feet its pilots had to wear full pressure flight suits similar to what was used aboard the space shuttle. Developed by the renowned Lockheed Skunk Works, the SR-71 was an awesome aircraft in every respect. It was withdrawn from use in 1998 when it was superseded by satellite technology. Twelve of the thirty-two aircraft were destroyed in accidents, but none were ever lost to enemy action. Throughout its thirty-four year career, the SR-71 was the world's fastest and highest flying operational manned aircraft. It set world records for altitude and speed: an absolute altitude record of 85,069 feet and an absolute speed record of 2,193.2 miles per hour. *The Complete Book of the SR-71 Blackbird* covers every aspect of the SR-71's development, manufacture, modification, and active service from the insider's perspective of one of its pilots and is lavishly illustrated with more than 400 photos. Former pilot and author Richard Graham also examines each of the fifty planes that came out of the SR-71 program: fifteen A-12s, three YF-12s, and thirty-two SR-71s, and tells each plane's history, its unique specifications, and where each currently resides. *Flying the SR-71 Blackbird* Richard H. Graham, 2008-07-15. For anyone who has ever wondered what it's like to fly the SR-71 on a secret Mach 3 reconnaissance mission, this book has the answer. Flying the SR-71 Blackbird takes readers along on an operational mission that only a few Air Force pilots have ever experienced. The Lockheed SR-71, unofficially known as the Blackbird, was an advanced long-range Mach 3 strategic reconnaissance aircraft developed by Lockheed Skunk Works. The aircraft flew so fast and high that not one was ever shot down, even by a missile. SR-71 pilot and instructor Colonel Richard Graham offers a rare cockpit perspective on how regular Air Force pilots and navigators transformed themselves into SR-71 Blackbird crews, turning their unique aviation talents to account in an unprecedented way. Arguably the world's foremost expert on piloting the Blackbird, Graham details as no one else could what an SR-71 mission entails, from donning a pressure suit to returning to base. 70+ EH-1 UH-1 Huey Helicopter Technical Manuals, Technical Bulletins, Modification Work Orders & Depot Maintenance Work Requirements Manuals U.S. Army, Over 15,000 total pages.
