The Routledge International Handbook of Transnational Studies Margit Fauser, Xóchitl Bada, 2024-01-23 The Routledge International Handbook of Transnational Studies offers a comprehensive overview of the dynamic evolution and the most recent debates in this interdisciplinary field. The collection assembles scholarship from the social sciences and the humanities that share a critical perspective extending beyond the nation state. The contributions investigate sustained connections, events and activities across state borders and acknowledge prevailing global power asymmetries. The handbook examines the dynamics of transnational processes across seven main themes: epistemological and methodological principles; transnational migrant practices and family remittances; mobilities and self-identities; social protection organizations and social movements; culture, religion and the arts and architecture and urban planning. The contributors engage with theoretical developments and analyze empirical cases involving a wide array of critical contemporary topics such as expatriate voting; first and second generation return migration; state sponsored cross border marriages; access to health care; transnational social work; global religious aesthetics; transnational art corridors; literary translation; remittance financed architecture and transnational processes of real estate development and gentrification among others. They display a series of cross-cutting approaches including postcolonial theory, racism and gender and a focus on agency, state policies and macro structures and transnational inequalities. This book features multidisciplinary scholars in transnational studies from Australia, Belgium, Canada, Finland, Germany, Italy, Malaysia, Mexico, the Philippines, Poland, Spain, Sweden, the United Kingdom and the United States. This handbook will be of interest to scholars interested in global and transnational perspectives across a wide range of disciplines. It will serve as a key resource for academics, students and other interested audiences seeking to familiarize themselves with the study of contemporary issues that cross state borders.

[The Oxford Handbook of Group and Organizational Learning](#) Linda Argote, John M. Levine, 2020-01-02 Groups and organizations vary dramatically in their ability to learn. Some acquire substantial knowledge as a function of experience while others do not. In groups, learning can occur at the level of the individual member and/or the group as a whole. In organizations, learning can occur at both of these levels as well as that of the wider collective. Besides varying in the amount and kind of information they acquire, groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units. In general, groups and organizations that are proficient in acquiring, retaining and transferring knowledge are more productive and more enduring than their less able counterparts. The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines. Because many of the same processes influence learning

in groups and organizations including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross fertilization of ideas These benefits are reciprocal in that research at the group level can shed light on how organizations learn whereas research at the organizational level can illuminate how groups learn By clarifying similarities and differences in the processes that underlie learning in groups and organizations the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity
