Planning, Regulation, and Competition: Automobile Industry, 1968 United States. Congress. Senate. Select Committee on Small Business. Subcommittee on Retailing, Distribution, and Marketing Practices, 1969. Considers the effects of the automobile industry's planning and regulating activities on competition. Includes Automobile Industry A Case Study of Competition by General Motors Corp. p 617-728 **Planning, Regulation, and Competition: Automobile Industry - 1968, Hearings Before Subcommittees ... 90-2, on the Question: are Planning and Regulation Replacing Competition in the American Economy? (the Automobile Industry as a Case Study), July 10, 23, 1968** United States. Congress. Senate. Select Committee on Small Business, 1968 GM Passes Ford, 1918-1938 Arthur J. Kuhn, 1986. The dramatic story of how upstart General Motors got ahead of pioneer Ford and has stayed ahead is told here along with an explanation of GM's success. This book argues that GM won the race by designing a successful performance control system in harmony with cybernetic principles and systems theory under the leadership of Alfred Sloan and his expert team. Henry Ford, the passionate individualist, meanwhile established a losing tradition described by the author as anti-team, anti-expert and anti-system. GM's recent difficulties according to Dr Kuhn are a result of its lapse from early policies. In 1921 Ford held the largest share of a market ever attained by a single manufacturer: 59% while GM had slipped from about 20% to 15%. Starting in 1924 GM climbed to over 40% of the market, a share it has held ever since while Ford fell to about 10%. GM has outperformed Ford even more sharply in return to shareholders. The author however does not gloss over GM's weaknesses, especially its laggard performance in consumer safety and its tunnel vision in product development.

Although the concepts of steermanship and inquiring systems were not set forth theoretically until after 1938 GM s leaders applied these concepts organizationally during the boom and bust 1920s and 1930s Most of the book describes the affinities and clashes of personality leading to GM s adoption and Ford s rejection of a performance control system The final chapters describe GM s generally superior performance but show why GM in spite of that has had difficulties in meeting recent challenges Here is exciting history with a compelling message
