7th Grade Science: Final Review Packet, 2012, Answer Key ©

Purpose: Your final exam is cumulative, which means it covers material from the whole year. This is not to torture you, it is to reinforce the main ideas, many of which you'll need next year, and give you a chance to demonstrate that you meet all the standards. We'll go over everything in this review packet together, and your exam questions will only come from this review packet. If you pay attention in class & complete the packet assignments, you'll be right as rain.

Suggestion: You can write your answers/notes in your notebook, or if you want, you can get a copy from homework online, save it to your own jump drive or home computer, put in a bunch of spaces and then print a copy you can write on as we go. ☺

General Science Methods:

Do you get the "big picture" about science? Do you understand the scientific method? Can you make observations, graph data, and draw conclusions about the data?

1. Define & give at least 1 example for each of the following:
 - a. Observation: something you can see, count, measure (quantify). Example: That tree is on fire.
 - b. Inference: A conclusion you reach based on your observations (may or may not be correct). Example: That tree was hit by lightning.
2. What is an hypothesis?
 - a. An educated guess about the answer to a question.
3. What is the purpose of graphs? To show data quickly
4. Describe the difference between variables (things that change) & constants (things that stay the same).
5. Which type of graph would you use for each of the following sets of data?
 - a. Your height every year from birth to age 12. Change over time = line graph
 - b. Your 2nd quarter grades for science, math, social studies & religion. Comparing quantities = bar graph
6. When is it ok to put things in your mouth during science lab? If Mrs. Maloney says ok.
7. What are the metric units for measuring the following?
 - a. Length or distance meters (or mm, cm, km)
 - i. How many mm in 1 cm? 10
 - b. Liquid volume liters
 - i. How many ml in 1 liter? 1000
 - c. Mass grams (mg, kg)
 - i. How many milligrams in 1 gram? 1000
8. What is the difference between qualitative data (what something is like, described with words) and quantitative data (how much of something there is, described with numbers)

Earth & Space Science: Properties of water, the atmosphere, the earth, the solar system...

1. What is the difference between renewable (earth can regenerate in 100 years or less) & nonrenewable resources (takes the earth longer than 100 years to make more)?
2. Which alternative energy resource is nonrenewable? nuclear
3. What are fossil fuels? Organic, Nonrenewable resources
 - a. Give 2 examples of fossil fuels. Coal, oil, natural gas
4. Give an example of an inexhaustible resource. Wind, solar
5. What are alternative energy resources? Non-fossil fuels
 - a. Give 2 examples of alternative energy resources. Wind, solar, geothermal, hydroelectric, biomass, nuclear.

Validity of Educational Assessments in Chile and Latin America Jorge Manzi,María Rosa García,Sandy Taut,2021-09-11 This edited volume presents a systematic analysis of

conceptual methodological and applied aspects related to the validation of educational tests used in Latin American countries Inspired by international standards on educational measurement and evaluation this book illustrates efforts that have been made in several countries to validate different types of educational assessments including student learning assessments measurements of non cognitive aspects in students teacher evaluations and tests for certification and selection It gathers the experience of validity studies from the main international assessments in Latin America PISA TIMSS ERCE and ICCS Additionally it shows the challenges that must be taken into account when evaluations are used to compare countries groups or trends of achievement over time The book builds on the premise that measurements in the educational field should not be used if there are no studies that support the validity of the interpretation of their scores or the use made of such tests It shows that despite the recognition given to validity relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use In doing so this volume increases awareness about the relevance of validity especially when assessments are key component of educational policies

Science and Technology Education Promoting Wellbeing for Individuals, Societies and Environments Larry Bencze, 2017-06-21 This edited volume provides theoretical and practical resources relating to the STEPWISE curricular and instructional framework STEPWISE is the acronym for Science Technology Education Promoting Wellbeing for Individuals Societies Environments It is a framework for organizing teaching and learning domains in ways that prioritize personal and social actions to address critical socioscientific issues that is controversial decisions by powerful individuals groups about science and technology and related fields that may adversely affect individuals societies and or environments The book contains chapters written by and or with teachers who have used STEPWISE to guide their instructional practices as well as chapters written by education scholars who have used a range of theoretical lenses to analyze and evaluate STEPWISE and in several cases described ways in which it relates to or could relate to their practices and or ways in which the framework might logically be amended Overall this book offers educators policy makers and others with resources useful for arranging science and technology education in ways that may assist societies in addressing significant potential personal social and or environmental problems such as dramatic climate change preventable human diseases species losses and social injustices associated with fields of science and technology

Science Education in Countries Along the Belt & Road Ronghuai Huang, Bing Xin, Ahmed Tlili, Feng Yang, Xiangling Zhang, Lixin Zhu, Mohamed Jemni, 2022-01-18 This book aims to highlight science education in countries along the Belt and Road It consists of 30 chapters divided into three main parts namely Arab and African countries Asian countries and European countries We invited science education experts from 29 Belt and Road countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology The major contributions of this book include 1 Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries 2 Discuss new insights of science

education in future years 3 Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts Angel M.Y. Lin, 2016-09-15 This book will be of interest to a broad readership regardless of whether they have a background in sociolinguistics functional linguistics or genre theories It presents an accessible meta language i e a language for talking about language that is workable and usable for teachers and researchers from both language and content backgrounds thus facilitating collaboration across content and language subject panels Chapters 1 to 3 lay the theoretical foundation of this common meta language by critically reviewing systematically presenting and integrating key theoretical resources for teachers and researchers in this field In turn Chapters 4 to 7 focus on issues in pedagogy and assessment and on school based approaches to LAC and CLIL drawing on both research studies and the experiences of front line teachers and school administrators Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge In closing Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry
