1. **Abstract:** This paper presents a new approach to the problem of finding the minimum number of edges in a graph that contains all the cycles of length at least k . The approach is based on the concept of a *cycle cover*, which is a set of cycles that cover all the edges of the graph. The minimum number of edges in a cycle cover is called the *cycle cover number*. The paper shows that the cycle cover number is equal to the minimum number of edges in a graph that contains all the cycles of length at least k .
