Ieee Paper Dma Using Verilog:

Real Chip Design and Verification Using Verilog and VHDL Ben Cohen, 2002 This book concentrates on common classes of hardware architectures and design problems and focuses on the process of transitioning design requirements into synthesizable HDL code Using his extensive wide ranging experience in computer architecture and hardware design as well as in his training and consulting work Ben provides numerous examples of real life designs illustrated with VHDL and Verilog code This code is shown in a way that makes it easy for the reader to gain a greater understanding of the languages and how they compare All code presented in the book is included on the companion CD along with other information such as application notes Conference Record of the 1991 IEEE Nuclear Science Symposium and Medical Imaging Conference, 1991 Proceedings of the IEEE 1999 Custom Integrated Circuits Conference, 1999 Fourth IEEE International Workshop on Computer Architecture for Machine Perception Chip Weems, 1997 **ICASSP '95**, 1995 Communicating Process Architectures 2005 J.F. Broenink, H.W. Roebbers, J.P.E. Sunter, 2005-09-09 The awareness of the ideas characterized by Communicating Processes Architecture and their adoption by industry beyond their traditional base in safety critical systems and security is growing The complexity of modern computing systems has become so great that no one person maybe not even a small team can understand all aspects and all interactions The only hope of making such systems work is to ensure that all components are correct by design and that the components can be combined to achieve scalability A crucial property is that the cost of making a change to a system depends linearly on the size of that change not on the size of the system being changed Of course this must be true whether that change is a matter of maintenance e g to take advantage of upcoming multiprocessor hardware or the addition of new functionality One key is that system composition and disassembly introduces no surprises A component must behave consistently no matter the context in which it is used which means that component interfaces must be explicit published and free from hidden side effect This publication offers strongly refereed high quality papers covering many differing aspects system design and implementation for both hardware and software tools concurrent programming languages libraries and run time kernels formal methods and applications **Innovative Mobile and Internet Services in Ubiquitous Computing** Leonard Barolli, Fatos Xhafa, Omar K. Hussain, 2019-06-18 This book highlights the latest research findings methods and techniques as well as challenges and solutions related to Ubiquitous and Pervasive Computing UPC In this regard it employs both theoretical and practical perspectives and places special emphasis on innovative mobile and internet services With the proliferation of wireless technologies and electronic devices there is a rapidly growing interest in Ubiquitous and Pervasive Computing UPC UPC makes it possible to create a human oriented computing environment in which computer chips are embedded in everyday objects and interact with the physical world Through UPC people can remain online even while underway thus enjoying nearly permanent access to their preferred services Though it has a great potential to revolutionize our lives UPC also poses a number of new research challenges
