

of Japan's competitiveness and the foreign industries success. From that point on, Deming's teachings and advice has been widely accepted by American industrialists and businessmen.

Buckman (2000) acknowledges that Deming's teachings have significantly improved productivity, and that his philosophy and approach has transformed American companies into efficient organizations. Based on Deming's framework, the TQM dimensions and organizational cultural factors: customer satisfaction, organizational culture, teamwork, leadership commitment and operational performance are presented in the matrix.

Customer Satisfaction

Deming (1993) emphasises product reliability, which means that an organisation must follow specific practices that impact the results during the product development process. He asserts that the achievement through statistical analysis (i.e. surveying both likes and dislikes) and worker management cooperation (i.e. increased training, expanding employee participation, reducing complexity etc.). Theoretically, by following this style of management, organisation's become improved from customer purchases and loyalty. Deming states that by taking into consideration customer ideas, requirements and/or requests, and involving employees in decision making processes, companies will overcome shortcomings and reap financial benefits. Overall, Deming's theory supports the "customer" focus approach, emphasises product quality
