Issues In Second Language Proficiency:

Issues in Second Language Proficiency Alessandro G. Benati, 2011-10-27 Benati provides clarity about the characteristics and notion of language proficiency in the field of second language acquisition. He looks at four areas of research paradigmatically related to the role of proficiency: theorizing and measuring second language proficiency, the dimensions of L2 proficiency, factors contributing to the attainment of L2 proficiency, and attaining L2 proficiency in the classroom. It also contains a variety of research accounts about the specific factors which have an effect on proficiency together with a theorised measurement of proficiency in second language research. It will be required reading for researchers in applied linguistics and second language acquisition.

High-Level Language Proficiency in Second Language and Multilingual Contexts Kenneth Hyltenstam, Inge Bartning, Lars Fant, 2018-06-21 The issue of high level language proficiency in other than monolingual contexts can be approached from a variety of perspectives including linguistic, structural, psycholinguistic, cognitive and sociolinguistic. Bringing together a team of experts, this volume takes a novel empirical approach to the subject combined with an up to date understanding of these research areas to answer two important research questions in the field of second language acquisition: what conditions allow learners to attain an outstanding level of proficiency in a second language and what factors still prevent them from becoming entirely like first language speakers. Looking at a range of European languages including English, French, Italian, Spanish and Swedish, it provides important insights into second language use at the highest levels as well as in high proficient mixed language use in multicultural settings. A useful tool for both language teaching and language teacher training, it provides a solid grounding for further study in this important area of research.
