E1205

advanced multi-function indicator

Description

General
This specification describes the E1205 advanced multi-function weight indicator, capable of stand-alone operation, or of integration into a larger system via serial, FieldBus and Ethernet interfaces.

It is a microprocessor-based industrial weighing system with up to 100,000 displayed increments for analysing, displaying, storing and transmitting gross and net weight information.

Up to 12 load cells to be connected with the indicator (16 with second scale). Analogue load cells or Avery Weigh-Tronix digital load cells may be used.

This indicator can display weight data from two scales simultaneously. Both scales are active and are independently weighing at all times.

The E1205 can be matched to almost any load cell system to achieve optimum accuracy, stability and repeatability.

The indicator can control its surrounding process using fully configurable I/O. Alternatively, control can be executed from a central system using an extensive range of available interfaces.
