### Transport Position

The top link and lower links should be placed in the transport position when not in use. Place the top link (1) in the vertical position and ensure by inserting the lock pin (2) through the top link and another bracket. Remove the pin with the spring clip as shown.

Each lower link slides along the pivot link (3). The pivot link should not be removed unless it is required to remove the lower links. Extract the lower pin (4) from the link assembly and insert the lower link (5) in the vertical position, as shown. Insert the pin through the upper hole in the lower link and when the holes in the lower and upper links (5) are correctly aligned. Before operating, the tractor should both pins are secured with lock pins.

To convert to the working position, remove the lock pins and put the pin (5) and manually lower the link and close to the operating position, as shown. Insert the removed pin in one of the holes (6) or (7), as required.

When installed in the rear hole (6) as shown, the lower link will be locked in a rigid unit. If the pin is installed in the front hole (7), the lower link will be allowed to move up and down freely, float through a range of angles. 75 mm (3 in). Release the pin with the lock pin.

Repeat on the other lower link, ensuring that both lower links are set on the same, i.e., both are locked in rigid units or both are allowed to float.
