Process Based Unification for Multi-model Software Process Improvement Z.D. Kelemen,2013-01-30 Many different quality approaches are available in the software industry Some of the ap proaches such as ISO 9001 are not software specific i e they define general requirements for an organization and they can be used at any company Others such as Automotive SPICE have been derived from a software specific approach and can be used for improving specific in this case automotive processes Some are created to improve development processes e g CMMI for Development others focus on services e g CMMI for Services and again others are related to particular processes such as software testing e g TMMi or resource manage ment e g People CMM A number of differences among quality approaches exist and there can be various situations in which the usage of multiple approaches is required e g to strengthen a particular process with multiple quality approaches or to reach certification of the compliance to a number of stand ards First of all it has to be decided which approaches have potential for the organization In many cases one approach does not contain enough information for process implementation Consequently the organization may need to use several approaches and the decision has to be made how the chosen approaches can be used simultaneously This area is called Multi

model Software Process Improvement MSPI The simultaneous usage of multiple quality approaches is called the multi model problem In this dissertation we propose a solution for the multi model problem which we call the Process Based Unification PBU framework The PBU framework consists of the PBU concept a PBU process and the PBU result We call PBU concept the mapping of quality approaches to a unified process The PBU concept is operationalized by a PBU process The PBU result includes the resulting unified process and the mapping of quality approaches to the unified process Accordingly we

addressed the following research question Does the PBU framework provide a solution **Migration Use Cases with the Migration Manager** Downing Bradley,Burak Bolek,David A Gutierrez,John Dibble,Kylie Cameron,Sampath

Sriramadhesikan,Scott Tyrrell,Thadeu de Russo e Carmo,Vasfi Gucer,IBM Redbooks,2011-05-23 The Migration Manager enables you to migrate configuration content from one production environment to another The typical use is to migrate configuration content from a development environment to a test environment and then on to production for the Tivoli process automation engine and its applications such as IBM Tivoli Change and Configuration Management Database CCMDB and IBM Tivoli Service Request Manager The goal of migration is to ensure that your production environment fully meets the needs of your users This IBM Redbooks publication covers the most common migration use cases with the Migration Manager Of course these use cases are only a small subset of the possible migration scenarios that can be performed by the Migration Manager but they were chosen to be representative of the capabilities of the Migration Manager In addition to these use cases the book presents a migration strategy and a comprehensive chapter about troubleshooting possible migration problems when using the Migration Manager We strongly suggest that you read Chapter 1 Migration strategy on page 1 first before reading the other chapters This chapter will give you a good foundation for all of the migration scenarios covered in the book This book will be a reference for IT Specialists and IT Architects working on migrating configuration content from one production environment to another using the Migration Manager [Los Baños: A Practical Guide For Newcomers](#) ,
