

THE MOCHE LIMA BEANS RECORDING SYSTEM, REVISITED

Tomi S. Melka

Abstract: One matter that has raised sufficient uncertainties among scholars in the study of the Old Moche culture is a system that comprises patterned Lima beans. The marked beans, plus various associated effigies, appear painted by and large with a mixture of realism and symbolism on the surface of ceramic bottles and jugs, with many of them showing an unparalleled artistry in the great area of the South American subcontinent. A range of accounts has been offered as to what the real meaning of these items is: starting from a recreational and/or a gambling game, to a divination scheme, to amulets, to an application for determining the length and order of funerary rites, to a device close to an accountancy and data storage medium, ending up with an 'ideographic', or even a 'pre-alphabetic' system.

The investigation brings together structural, iconographic and cultural aspects, and indicates that we might be dealing with an original form of mnemotechnology, contrived to solve the problems of medium and long-distance communication among the once thriving Moche principalities. Likewise, by reviewing the literature, by searching for new material, and exploring the structure and combinatory properties of the marked Lima beans, as well as by placing emphasis on joint scholarly efforts, may enhance the studies.

Key words: ceramic vessels, communicative system, data storage and transmission, fine-line drawings, iconography, 'messengers', painted/incised Lima beans, patterns, pre-Inca Moche culture, 'ritual runners', tokens

"Como resultado de la falta de testimonios claros, todas las explicaciones sobre este asunto parecen inútiles; divierten a la curiosidad sin satisfacer a la razón." [Due to a lack of clear evidence, all explanations on this issue would seem useless; they entertain the curiosity without satisfying the reason]

Moche Lima Beans Recording System:

Indigenous Graphic Communication Systems Katarzyna Mikulksa, Jerome A. Offner, 2020-01-17 Indigenous Graphic Communication Systems challenges the adequacy of Western academic views on what writing is and explores how they can be expanded by analyzing the sophisticated graphic communication systems found in Central Mesoamerica and Andean South America. By examining case studies from across the Americas the authors pursue an enhanced understanding of Native American graphic communication systems and how the study of graphic expression can provide insight into ancient cultures and societies expressed in indigenous words. Focusing on examples from Central Mexico and the Andes the authors explore the overlap among writing, graphic expression and orality in indigenous societies inviting reevaluation of the Western notion that writing exists only to record language the spoken chain of speech as well as accepted beliefs of Western alphabetized societies about the accuracy, durability and unambiguous nature of their own alphabetized texts. The volume also addresses the rapidly growing field of semasiography and relocates it more productively as one of several underlying operating principles in graphic communication systems. Indigenous Graphic Communication Systems reports new results and insights into the meaning of the rich and varied content of indigenous American graphic expression and culture as well as into the societies and cultures that produce them. It will be of great interest to Mesoamericanists, students and scholars of anthropology, archaeology, art history, ancient writing systems and comparative world history. The research for and publication of this book have been supported in part by the National Science Centre of Poland, decision no NCN KR 0011 122 13 and the Houston Museum of Natural Science. Wiersema, 2015-01-30 Adding an important new chapter to pre-Columbian art history this volume is the first to assemble and analyze a comprehensive body of ancient Andean architectural representations as well as the first that explores their connections to full scale pre-Hispanic ritual architecture.

Indigenous Struggles in the United States Barbara Alice Mann, 2025-06-10 This book sheds light on the intricate history of Indigenous America's struggle for identity and sovereignty. Examining the utilization of a divide and conquer strategy through federal recognition in the United States the book offers a profound analysis of the tactics employed by the U.S. government to subdue Indigenous peoples. From the early days of American colonization the U.S. sought to eliminate Indigenous competition for land leading to a complex interplay of alliances and divisions within Indigenous communities. This book investigates the government's systematic efforts to redefine racial identity ultimately erasing Indigenous people from official records. The book calls for a reclamation of Indigenous America's narrative emphasizing the importance of self-representation and unity. This compelling work challenges readers to confront the enduring consequences of historical injustices and rethink the concept of identity in a rapidly changing world. **The Madman's Library** Edward

stone carving Drawing on Lau s extensive experience as an archaeologist in highland Peru this book reveals how ancient groups of the Central Andes have used stone as both a physical and symbolic resource uncovering the variety of experiences and meanings which marked the region s special engagement with this material An abundant raw resource in the Andes stone was used for monuments sculptures and other valuables such as carved monoliths which were crucial to the emergence of civilization in the region and religious objects from magical charms to ancestor effigies Detailing the ways stone has played both an everyday and an extraordinary part in ancient social life Lau also examines how cultural dispositions towards this fundamental material have changed over time and considers how contemporary engagements with these stone remains have the potential to create and regenerate communities With an ample selection of color photos which bring these sites and artifacts to life An Archaeology of Ancash is an essential guide to the key monuments places and objects that distinguish this region and its rich archaeological heritage

Thinking with Things Esther Pasztory,2005-08-01 At its heart Pasztory s thesis is simple and yet profound She asserts that humans create things some of which modern Western society chooses to call art in order to work out our ideas that is we literally think with things Pasztory draws on examples from many societies to argue that the art making impulse is primarily cognitive and only secondarily aesthetic She demonstrates that art always reflects the specific social context in which it is created and that as societies become more complex their art becomes more rarefied Jacket

People, Plants and Genes Denis J Murphy,2007-07-19 This book provides a comprehensive interdisciplinary overview of human plant interactions and their social consequences from the hunter gatherers of the Palaeolithic Era to the 21st century molecular manipulation of crops It links the latest advances in molecular genetics climate research and archaeology to give a new perspective on the evolution of agriculture and complex human societies across the world Even today our technologically advanced societies still rely on

plants for basic food needs not to mention clothing shelter medicines and tools This special relationship has tied together people and their chosen plants in mutual dependence for well over 50 000 years Yet despite these millennia of intimate contact people have only domesticated and cultivated a few dozen of the tens of thousands of potentially available edible plants This limited domestication process led directly to the evolution of the complex urban based societies that have dominated much of human development over the past ten millennia Thanks to the latest genomic studies we can now begin to explain how when and where some of the most important crops came to be domesticated and the crucial roles of plant genetics climatic change and social organisation in these processes Indeed it was their unique genetic organisations that ultimately determined which plants eventually became crops rather than any conscious decisions by their human cultivators The book is aimed at a wide audience ranging from plant specialists such as geneticists molecular biologists and agronomists to a more general readership of archaeologists anthropologists historians and others who wish to explore the complex processes that have shaped the often crucial relationships between plants and human societies over the past hundred millennia
