There appears to be something in the water in Bismarck Bay. The 1994-1995 season was the first in which we collected reports that numerous humpback whales were present. About a dozen humpbacks were reported swimming offshore in a small bay on the northeast coast, and humpbacks were also seen further west along the coast. Humpbacks are still not doing as well as they used to.

Supplementary Material and Solutions Manual for Mathematical Modeling in the Environment Charles R.

Hadlock,2020-05-05 This manual is meant to provide supplementary material and solutions to the exercises used in Charles Hadlock's textbook *Mathematical Modeling in the Environment*. The manual is invaluable to users of the textbook as it contains complete solutions and often further discussion of essentially every exercise the author presents in his book. This includes both the mathematical/computational exercises as well as the research questions and investigations. Since the exercises in the textbook are very rich in content rather than simple mechanical problems and cover a wide range, most readers will not have the time to work out every one on their own. Readers can thus still benefit greatly from perusing solutions to problems they have at least thought about briefly. Students using this manual still need to work out solutions to research questions using their own sources and adapting them to their own geographic locations or to numerical problems using their own computational schemes, so this manual will be a useful guide to students in many course contexts. Enrichment material is included on the topics of some of the exercises. Advice for teachers who lack previous environmental experience but who want to teach this material is also provided and makes it practical for such persons to offer a course based on these volumes. This book is the essential companion to *Mathematical Modeling in the Environment*. AR 5-11 MANAGEMENT OF ARMY MODELING AND SIMULATION, Survival Ebooks.
