special forces and the whole range of unique and modified vehicles that Russia's elite units use from combat snowmobiles to the world's biggest water cannon. Elite forces need elite vehicles. As Vladimir Putin has devoted effort and funds into modernising Russia's armed forces and turning them into an instrument geared not just for defending the Motherland but also projecting power beyond its borders, Russia has seen a growing emphasis on special and specialist forces. Traditionally the elite Spetsnaz commandos had to make do with regular vehicles or civilian based technicals not least to conceal their presence or indeed very existence. Now increasingly at the forefront of Russian power projection the Spetsnaz are acquiring more capable versatile vehicles such as the paratroopers BTR D personnel carrier and also experimenting with exotic specialist new acquisitions such as the Chaborz M 3 buggy and Yamaha Grizzly all terrain vehicle. The other elite branches of Russia's forces such as the Arctic warfare troops of the 200th Independent Motor Rifle Brigade the paratroopers of the Air Assault Troops VDV the Naval Infantry and the elite units of the security forces are also developing and fielding new vehicles for their specialist roles from combat snowmobiles to urban warfare vehicles. From highly mobile LMVs able to operate in the deserts of Syria or the streets of Ukraine through dedicated fire support vehicles such as the air droppable Sprut SD or the massive BMPT Terminator to amphibious tanks and drone equipped security trucks these are the workhorses of Russia's special forces. This study explores all these combat vehicles in detail combining expert analysis from Russia expert Mark Galeotti with highly accurate full colour illustrations and photographs.

Rathore,2014-11-19 This book is a compilation of papers contributed by researchers and scientists from SAARC nations and deals with high impact weather conditions their prediction and potential consequences for populations in the SAARC region. There have been a number of recent advances in our understanding and prediction of cyclones severe thunderstorms squalls heat and cold waves droughts and heavy rainfall based on the latest observational data and NWP modeling platform. The SAARC region is vulnerable to high impact weather events because of geophysical features like high mountains plateaus and vast oceans. As our climate continues to change over the coming years the likelihood of extreme and potentially high impact weather and climate events will be at its highest when natural and anthropogenic effects combine. All chapters were written by leading experts in their respective research and operational fields. The book reviews the latest research future needs forecasting skills and societal impacts of extreme weather events and offers high quality reference material for weather forecasters disaster managers and researchers.
