Artificial Neural Nets and Genetic Algorithms David W. Pearson, Nigel C. Steele, Rudolf Albrecht, 2011-06-28 The 2003 edition of ICANNGA marks a milestone in this conference series because it is the tenth year of its existence The series began in 1993 with the inaugural conference at Innsbruck in Austria At that first conference the organisers decided to organise a similar scientific meeting every two years As a result conferences were organised at Ales in France 1995 Norwich in England 1997 Portoroz in Slovenia 1999 and Prague in the Czech Republic 2001 It is a great honour that the conference is taking place in France for the second time Each edition of ICANNGA has been special and had its own character Not only that participants have been able to sample the life and local culture in five different European countries Originally limited to neural networks and genetic algorithms the conference has broadened its outlook over the past ten years and now includes papers on soft computing and artificial intelligence in general This is one of the reasons why the reader will find papers on fuzzy logic and various other topics not directly related to neural networks or genetic algorithms included in these proceedings We have however kept the same name International Conference on Artificial Neural Networks and Genetic Algorithms All of the papers were sorted into one of six principal categories neural network theory neural network applications genetic algorithm and evolutionary computation theory genetic algorithm and evolutionary computation applications fuzzy and soft computing theory fuzzy and soft computing applications

Nature-Inspired Networking Phan Cong-Vinh, 2018-02-13 Nature inspired includes roughly speaking bio inspired physical inspired social inspired and so on This book contains highly original contributions about how nature is going to shape networking systems of the future Hence it focuses on rigorous approaches and cutting edge solutions which encompass three classes of major methods 1 Those that take inspiration from nature for the development of novel problem solving techniques 2 Those that are based on the use of networks to synthesize natural phenomena and 3 Those that employ natural materials to compute or communicate

Resources in Education, 2001-04 **Combinatorial Optimization Problems in Planning and Decision Making** Michael Z. Zgurovsky, Alexander A. Pavlov, 2018-09-24 The book focuses on the next fields of

computer science combinatorial optimization scheduling theory decision theory and computer aided production management systems It also offers a quick introduction into the theory of PSC algorithms which are a new class of efficient methods for intractable problems of combinatorial optimization A PSC algorithm is an algorithm which includes sufficient conditions of a feasible solution optimality for which their checking can be implemented only at the stage of a feasible solution construction and this construction is carried out by a polynomial algorithm the first polynomial component of the PSC algorithm an approximation algorithm with polynomial complexity the second polynomial component of the PSC algorithm also for NP hard combinatorial optimization problems an exact subalgorithm if sufficient conditions were found fulfilment of which during the algorithm execution turns it into a polynomial complexity algorithm Practitioners and software developers will find the book useful for implementing advanced methods of production organization in the fields of planning including operative planning and decision making Scientists graduate and master students or system engineers who are interested in problems of combinatorial optimization decision making with poorly formalized overall goals or a multiple regression construction will benefit from this book

Truck Scheduling for Parcel Hubs with Limited Conveyor Capacities Stefan Bugow,2023-02-16 In the postal service industry parcel hubs are widely used to consolidate freight on an intermediate stage of the distribution network By consolidating parcels the utilization of trucks is increased transportation costs can be reduced and shorter delivery times can be achieved The internal transfer of parcels in these parcel hubs is mainly conducted on capacity constrained conveyor systems Individual conveyors can easily be overburdened in case a multitude of incoming trucks with a large number of parcels designated for the same conveyor are unloaded concurrently Thus scheduling incoming trucks efficiently is crucial for the operational performance of the parcel hub This book explores different approaches to optimize the truck scheduling problem at parcel hubs by developing several mathematical optimization models Further the author illustrates efficient algorithms to solve the mathematical problem and designs a simulation model to further investigate the problem setting The results show that optimized truck schedules have the potential to significantly improve the operational performance of parcel hubs
