Victor,2018 Ten years after the publication of the first edition of this influential book the evidence is even stronger that human economies are overwhelming the regenerative capacity of the planet This book explains why long term economic growth is infeasible and why especially in advanced economies it is also undesirable Simulations based on real data show that managing without growth is a better alternative Cincinnati Magazine ,2006-04 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region **The Software Encyclopedia 2001** ,2001 *Anthropocene Feminism* Richard Grusin,2017-03-21 What does feminism have to say to the Anthropocene How does the concept of the Anthropocene impact feminism This book is a daring and provocative response to the masculinist and techno normative approach to the Anthropocene so often taken by technoscientists artists humanists and social scientists By coining and for the first time fully exploring the concept of anthropocene feminism it highlights the alternatives feminism and queer theory can offer for thinking about the Anthropocene Feminist theory has long been concerned with the anthropogenic impact of humans

particularly men on nature. Consequently the contributors to this volume explore not only what current interest in the Anthropocene might mean for feminism but also what it is that feminist theory can contribute to technoscientific understandings of the Anthropocene. With essays from prominent environmental and feminist scholars on topics ranging from Hawaiian poetry to Foucault to shelled creatures to hypomodernity to posthuman feminism this book highlights both why we need an anthropocene feminism and why thinking about the Anthropocene must come from feminism. Scaling-Up Equitable Nutritional Care for Girls and Women in South Asia Vani Sethi, Manisha Nair, Neena Bhatia, Zivai Murira, Charu Arora, Divya Tripathi, 2025-04-29. South Asia contributes to 40 per cent of the annual global low birth weight burden with an estimated 10 million children born with low birth weight. Poor women's nutrition and gender inequalities are the main causes for stagnantly high prevalence of low birth in South Asia. In South Asia most women enter pregnancy with one of more nutrition risks: 22% of women are too thin, 49% women are anaemic, 20% suffer from obesity, 10% are adolescents and 35% are too short for their age. The low diversity of diets of women is worrisome particularly in fragile countries: for example 26% of adolescent girls and women access a minimally diverse diets in Afghanistan. Data also shows that 90% of women in India, Bangladesh and Pakistan are affected with at least one of the three micronutrient deficiencies: iron, zinc and folate.
