Construction Manual for Polymers + Membranes Jan Knippers, Jan Cremers, Markus Gabler, Julian Lienhard, 2012-12-17 Whether it be as translucent sheets broadly stretched membranes and inflated foil cushions or in graceful organic curves architecture today is utilizing plastics in the most disparate forms and for a wide variety of purposes Innovative technical developments are constantly improving its material properties at the same time there is a growing new awareness of its potential as a construction material While plastics used to be employed primarily as an inexpensive variant on traditional building materials they are increasingly regarded in the construction world today as a serious and viable alternative be it as supporting structures roofs facades or elements of interior design and decoration Thanks in large part to this inherent self sufficiency plastics are currently enjoying an unprecedented surge in popularity even among the international architectural avant garde as multiwall sheets or corrugated fiber reinforced panels or as filling between glass panes And the new generation of ecological bioplastics also pays tribute to the debate on sustainability ridding plastics of their lingering reputation as environmental offenders From the history of plastics and membranes in architecture to their material properties and requirements in construction and design the **Plastics and Membranes Construction Manual** cuts to the chase providing the kind of solid and comprehensive overview of the subject that readers have come to expect from the Im DETAIL series Selected project examples round off the reference work and make it indispensable for the day to day life of the professional planner and for every architecture library

Glass

Construction Manual Dieter Balkow,1999 This is a reference work on working with glass This volume aims to show the wide range of possibilities for using glass in construction beginning with a historical overview of glass in architecture and explores the principles of construction with such practical aspects as fixing systems Façades Ulrich Knaack,Tillmann Klein,Marcel Bilow,Thomas Auer,2014-09-05 Introduction to building fa ades as revised edition Fa ades determine the appearance of a building Hence they constitute a major element in architecture At the same time the building s envelope has important functions to fulfil such as lighting weatherproofing thermal insulation load transfer and sound insulation Over the past 15 years fa ades have become increasingly complex intelligent facades for instance adapt to changing climate and lighting conditions Newly developed materials and technologies have broadened the scope of fa ade functions This book demonstrates the principles of fa ade construction It systematically describes the most common types such as post and beam fa ade curtain wall corridor fa ade or double fa ade and provides guidelines for appropriate detailing Numerous drawings made especially for the book explain the principles of different types of facades which are then illustrated with built examples For this second edition all chapters were revised and all four examples in the case studies chapter were replaced by new material The new chapter Future Fa ades offers insights into what s next Modern Construction Handbook Andrew Watts,2022-11-21 New edition of the popular handbook The Modern Construction Handbook has become a classic of advanced construction literature not least due to its regular revisions and clear structure with chapters titled Material Wall Roof Structure Environment and Applications Tried and tested component details examples focusing on sustainability and energy consumption and an update on finite element analysis FEA and computational fluid dynamics CFD introduced in the last edition set new standards for this handbook which serves as a foundational textbook in many architecture courses As a primer Handbook to building design it is a starting point for the more advanced books Modern Construction Envelopes Modern Construction Case Studies Modern Environmental Design and Modern Structural Design by Andrew Watts Relevant details and examples for studies The most important aspects of building design covered in six chapters Project neutral drawings Architectural Details 2003 Detail Magazine,2016-01-08 This is a compilation of the full year s information including the Discussion section where well known architects and critics as well as specialist authors and architectural historians articulate their views the Documentation section containing an analysis of selected projects in which buildings from around the world are covered in depth and the Technology section where the specific theme of each issue of the magazine is treated in greater depth Along with these are illustrations of the high standards that Detail is known for where all plan drawings are true to scale and have been approved by the architects planners and engineers responsible for the original design This annual sourcebook is a beautiful record not only of the year s Detail publication but of some of the best and most innovative contemporary architecture **Basics Glass Construction** Andreas Achilles,Diane Navratil,2017-05-22 Glass construction is one of the most varied and innovative areas of structural design Glass connects exterior and interior

spaces at the same time it protects the interior space from the outside world Its constructional possibilities go far beyond classical window constructions Special glasses possess astonishing physical characteristics and can thus be used in varied and creative ways Topics Glass as building material Processing and finishing Applications Construction types Connections Mountings **Performance of Combustible Façade Systems Used in Green Building Technologies Under Fire**

Gaurav Srivastava,Pravinray D. Gandhi,2021-08-31 This book addresses fire safety of combustible fa ade systems which has gained much attention in recent times due to several major fire accidents across the world where combustible fa ade systems had a significant role in enhancing the growth of fire The Grenfell tower London fire is one of the most severe accident in this category The book covers basic design and functional aspects of commonly used fa ade systems along with the materials typically used in such systems Subsequently it discusses the currently available testing methods at component level intermediate level and system level It also provides detailed case studies of six full scale real fire fa ade fire experiments that have been jointly carried out by IIT Gandhinagar and Underwriters Laboratories at the full scale fa ade testing facility established at IIT Gandhinagar The book will enable designers and decision makers to make better assessments regarding fire safety of existing and upcoming fa ade systems It also serves as a guide to deciding which testing methods are more appropriate under certain conditions Basics Facade Apertures Roland Krippner,Florian Musso,2017-05-22 Facade

apertures represent the realm of the exterior wall or facade which establishes the connection between inside and out and makes it possible to illuminate and ventilate the spaces behind it This volume deals with the various forms of openings such as doors windows ventilation elements and fixed glass panes and their materialization which also varies according to function special attention is given to the subject of edges Themes Types and positions of openings Technical requirements Construction types Connections edges **Components and Systems** Gerald Staib,Andreas Dörrhöfer,Markus

Rosenthal,2013-01-07 Construction systems reduced to the smallest possible number of identical elements have long been used by architects to build structures as well as dismantle and change them as quickly efficiently and economically as possible Think of the architecture of the nomads the Crystal Palace designed by the architect John Paxton for the London World s Fair of 1851 or the modern construction systems of the nineteenth and twentieth centuries in steel concrete and wood Coupled with modern digital planning and production methods modular precast construction systems that are adaptable for many combinations and capable of being combined with one other will play an increasingly important role in architecture in the future The volume Components and Systems offers an in depth and clearly organized presentation of the various types of precast building components from semifinished products to building with components open and closed systems and skeleton and panel construction all the way to spatial cell constructions The systems are accompanied by detailed drawings and color photographs Discussions of transporting and assembling the various systems round off the topic and make this book an indispensable practical companion Seit jeher werden in der Architektur auf m glichst wenige gleiche

Elemente reduzierte Bausysteme verwendet um möglichst schnell effizient und ökonomisch ein Bauwerk errichten oder auch abbauen und verändern zu können. Man denke an die Architektur der Nomaden, den Kristallpalast der 1851 anlässlich der in London stattfindenden Weltausstellung von dem Architekten John Paxton entworfen wurde oder die modernen Bausysteme des 19. und 20. Jahrhunderts in Stahl-Beton oder Holz. Elementierte vorgefertigte für viele Kombinationen anpassungsfähige und untereinander kombinierbare Systeme werden zukünftig gekoppelt mit modernen digitalen Planungs- und Produktionsmethoden einen immer wichtigeren Aspekt in der Architektur darstellen. Der neue Band **Elemente und Systeme** zeigt fundiert und übersichtlich die verschiedenen Arten vorgefertigter Bauteile auf von Halbfabrikaten über das Bauen mit Komponenten offenen und geschlossenen Systemen, Skelett- und Paneelbauweisen bis zu Raumzellenkonstruktionen. Ergänzt werden die Systeme durch detaillierte Zeichnungen und Farbfotos. Transport und Montage der verschiedenen Systemelemente runden das Thema ab und machen dieses Buch in der Praxis unverzichtbar.

Contemporary Curtain Wall Architecture

Scott Charles Murray, 2009-10-07. In *Contemporary Curtain Wall Architecture*, building technology historian and architect Scott Murray traces the evolution of the curtain wall from early skeleton frame structures of the past to today's complex and technologically advanced configurations. Presenting twenty-four detailed case studies of exemplary structures completed in the last decade, he reveals the curtain wall as one of the most enduring and malleable concepts of contemporary architecture, capable of adapting intelligently to site constraints, utilizing resources efficiently, and offering unprecedented opportunities for innovations in digital design and fabrication, material detailing, and aesthetic expression. **Book Jacket**

Glass in Building, Bernhard Weller, Stefan Unnewehr, Silke Tasche, Kristina Härth, 2012-12-10. *Glass in Building* opens up a whole range of fascinating design possibilities for the planning architect. Glass has long served as a translucent room-closing element, but its range of possible uses is actually much wider. It not only offers protection against the external world, for example noise or fire, despite its apparent fragility it can even take on load-bearing functions in supporting structures. In combination with various different finishing methods, materials and coatings, it also satisfies exacting structural and physical standards. *Glass in Building* offers a clear, compact and illustrated overview of the material, appropriate use of this varied and versatile material in building construction and provides information that goes far beyond the basics on designing with glass and producing and using specialized glass products, as well as on the building and planning regulations that must be taken into account when constructing with glass. A selection of exemplary realized projects rounds out the theoretical section. Das Bauen mit Glas eröffnet dem planenden Architekten faszinierende gestalterische Möglichkeiten. Schon lange dient es als lichtdurchlässiger Raumabschluss, ist aber weitaus vielfältiger einsetzbar. Glas bietet nicht nur Schutz vor der Außenwelt, etwa gegen Lärm oder Feuer, sondern kann trotz seiner vermeintlichen Zerbrechlichkeit sogar lastabtragende Funktionen innerhalb eines Tragwerks übernehmen. In Kombination mit verschiedenen Veredelungsmethoden, Materialien und Beschichtungen erfüllt es auch hohe bauphysikalische Anforderungen. **Detail Practice** Konstruktiver Glasbau liefert einen kompakten, anschaulichen

berblick ber den materialgerechten Einsatz dieses facettenreichen Baustoffs in der Baukonstruktion und vermittelt weit ber die Grundlagen hinausreichende Informationen zum Entwerfen mit Glas zur Herstellung und Anwendung spezieller Glasprodukte sowie zu den baurechtlichen Regelungen die im Glasbau zu ber ecksichtigen sind Eine Auswahl beispielhafter realisierter Projekte rundet den theoretischen Teil ab **Materials for Architects and Builders** Arthur Lyons, 2010-08-31 A necessary purchase for level 1 and 2 undergraduates studying building construction materials modules Materials for Architects and Builders provides an introduction to the broad range of materials used within the construction industry and contains information pertaining to their manufacture key physical properties specification and uses Construction Materials is a core module on all undergraduate and diploma construction related courses and this established textbook is illustrated in colour throughout with many photographs and diagrams to help students understand the key principles This new edition has been completely revised and updated to include the latest developments in materials appropriate technologies and relevant legislation The current concern for the ecological effects of building construction and lifetime use are reflected in the emphasis given to sustainability and recycling An additional chapter on sustainability and governmental carbon targets reinforces this issue **Design and Construction of Bioclimatic Wooden Greenhouses, Volume 3** Gian Luca Brunetti, 2022-12-19 This book is the third of four dealing with bioclimatic design and construction by focusing on the most basic and polyvalent of modern environmental systems the bioclimatic greenhouse the Swiss army chainsaw of architecture More specifically this third volume focuses on how the envelope of bioclimatic wooden greenhouses may be designed and built In more general terms it helps us to consider how to design and build the transparent and opaque enclosures of bioclimatic low energy architecture with low environmental impact This multi volume book covers both free standing greenhouses that can naturally heat and cool themselves and lean to greenhouses that support the natural heating and cooling of buildings this includes both agricultural greenhouses and greenhouses suited to host people As a result it is a trans disciplinary work deriving its areas of concern from a broad range of study areas spanning from environmental to constructional to structural drawing the clarity of the approach from the fact that the topics are presented by a single author with a single voice and a designer s mindset To achieve this the book adopts a composite set of explanatory strategies and communication registers including extensive support by 3D construction drawings and examples and presents not only state of the art solutions but also experimental ones *Rethinking Building Skins* Eugenia Gasparri, Arianna Brambilla, Gabriele Lobaccaro, Francesco Goia, Annalisa Andaloro, Alberto Sangiorgio, 2021-12-05 Rethinking Building Skins Transformative Technologies and Research Trajectories provides a comprehensive collection of the most relevant and forward looking research in the field of fa ade design and construction today with a focus on both product and process innovation The book brings together the expertise creativity and critical thinking of more than fifty global innovators from both academia and industry to guide the reader in translating research into practice It identifies new opportunities for the

construction sector to respond to present challenges towards a more sustainable efficient connected and safe future Introduces the reader to the role of fa ades with respect to the main challenges ahead Provides an overview of the major fa ade technological advancements throughout history and identifies prospective research trajectories Includes interviews with key industry players from different backgrounds and expertise Showcases a comprehensive range of leading research topics in the field organised by product and process innovation Covers major innovations across the value chain including fa ade design fabrication construction operation and maintenance and end of life Contributes towards the definition of an international research agenda and identifies emerging market opportunities for the fa ade industry *Enclose | Build* Eva Maria Herrmann,Martin Krammer,Jörg Sturm,Susanne Wartzeck,2015-07-01 The building shell is the interface with the outside world it offers protection and at the same time represents its owners or occupants But what are the criteria for choosing a specific shell Why is a particular material used on a particular undercoat The fifth volume of the SCALE series *Enclose Build* is not about the curtain the dressing of the facade that surrounds a building but rather on a causal level about the exterior termination of a building the wall the facade which can be made of various materials surfaces and achieves different design effects It shows the conditions under which certain constructions can be employed and why what criteria such as construction costs issues of sustainability of energy efficiency of assembly or of insulation or protection against moisture can also influence the choice of a system In addition to classical constructions *Enclose Build* offers a look at future developments How will the facade evolve as an interface for information What do viable concepts for environmentally active energy efficient building shells look like *Enclose Build* is an indispensable tool for every architect and planner
