e-Transformation: Enabling New Development Strategies Nagy K. Hanna, 2009-11-11 Could information and communication technology ICT become the transformative tool for a new style of global development Could ICT promote knowledge based innovation driven and smart adaptive participatory development As countries seek a way out of the present period of economic contraction they are trying to weave ICT into their development strategies in the same way organizations have learned to use ICT to transform their business models and strategies This integration offers a new path to development that is responsive to the challenges of our times In e Transformation Nagy Hanna identifies the key ingredients for the strategic integration of ICT into national development with examples from around the world He draws on his rich experience of over 35 years at the World Bank and other aid agencies to outline the strategic options involved in using ICT to maximize developmental impact transforming public service institutions networking businesses for innovation and competitiveness and empowering communities for social inclusion and poverty reduction He identifies the key interdependencies in e transformation and offers a holistic framework to tap network effects and synergies across all elements of the process including leadership cyber policies institutions human resources technological competencies information infrastructure and ICT uses for government business and society Integrating analytical insights and practical applications across the fields of development political economy public administration entrepreneurship and technology management the author candidly argues that e transformation like all bold ideas faces implementation challenges In particular the aspiration reality gap needs to be systematically addressed if ICT enabled innovation and transformation is to become a development practice E transformation is first and foremost about thinking strategically and creatively about the options made possible by the information technology revolution in the context of globalization To this end the author provides tools and best practices designed to nurture innovation select entry points prioritize among competing demands and sequence and scale up He outlines the roles of all participants political managerial entrepreneurial social and technical whose leadership is essential for successful innovation **Handbook of Research on Global Information Technology Management in the Digital Economy** Raisinghani, Mahesh S., 2008-01-31 Includes the most important issues concepts trends and technologies in the field of global information technology management covering topics such as the technical platform for global IS applications

information systems projects spanning cultures managing information technology in corporations and global information technology systems and socioeconomic development in developing countries **The Global Digital Divides** James B. Pick, Avijit Sarkar, 2015-04-15 This book analyzes extensive data on the world's rapidly changing and growing access to use and geographies of information and communications technologies It studies not only the spatial differences in technology usage worldwide but also examines digital differences in the major world nations of China India the United States and Japan at the state and provincial levels At the global level factors such as education innovation judicial independence and investment are important to explaining differences in the adoption and use of technology The country studies corroborate consistent determinants for technology usage for education urban location economic prosperity and infrastructure but also reveal unique determinants such as social capital in the United States and India exports in China and working age population and patents in Japan Spatial patterns are revealed that indicate clusters of high and low technology use for various nations around the world the countries of Africa and for individual states provinces within nations Based on theory novel findings and phenomena that have remained largely unreported the book considers the future of the worldwide digital divides the policy role of governments and the challenges of leadership *Enabling Enterprise Transformation* Nagy K. Hanna, 2009-12-11 Private enterprises in advanced economies have been learning to use information and communication technology ICT to innovate and transform their processes products services and business models significantly improving productivity and competitiveness Moreover the ICT industry itself has become a major source of job creation and a contributor to economic growth and business transformation A key question today is whether and how developing countries can learn to benefit from the ICT revolution and what roles the government and private sector can play Already a number of developing countries have been inspired by the example of India and China and are now seeking to jump on the outsourcing bandwagon Nevertheless with few exceptions in the developing world little attention has been paid by policymakers and practitioners to invest systematically and proactively in ICT enabled growth poverty reduction and grassroots innovation Most communities and small and medium sized enterprises in developing countries for example face multiple constraints to adopting and leveraging this general purpose technology and lack the capabilities for maximizing its potential In *Enabling Enterprise Transformation* Nagy Hanna draws on his rich experience of over 35 years at the World Bank and other aid agencies as a development strategist and ICT policy expert the most current research and best practices from around the world to provide practical tools for promoting economic and social transformation through ICT He assesses various initiatives to develop and diffuse ICT such as innovation funds incubators parks public private partnerships and comprehensive promotion programs He argues for the strategic options now open for developing countries to participate in ICT production to deploy ICT to transform industries and services and to leverage ICT as a new national infrastructure for improving the business environment and enhancing the competitiveness of the whole economy The challenge for leaders in developing countries is to

create such social and institutional dynamics for learning about ICT use and adaptation at many levels Lessons gained so far from programs to build these social learning and innovation capabilities at the institutional and grassroots levels should be shared among developing countries and a dialogue among business leaders policymakers development agencies educational institutions and the general citizenry must be advanced
