Globalization Difference And Human Security:

Globalization, Difference, and Human Security Mustapha Kamal Pasha, 2013-10-23 Globalization Difference and Human Security seeks to advance critical human security studies by re framing the concept of human security in terms of the thematic of difference Drawing together a wide range of contributors the volume is framed among others around the following key questions What are the silences and erasures of advancing a critical human security alternative without making recognition of difference its central plank How do we rethink the complex interplay of human security and difference in distinct and varied spatial and cultural settings produced by global forces What is the nexus between human security and the broader field of global development What new challenges to Human Security and International Relations are produced with the rise of the post liberal or post secular subject In what ways releasing human security from identification with the territorial state helps reconceptualize culture How does Human Security serve as a subspecies of modern humanitarian thought or the latter reinforce imperial imaginaries and the structures of order and morality Is the pursuit of indigenous rights fundamentally counterpoised to the pursuit of human security What difference it might make to take the doings and beings of communities of subsistence rather than basic needs wealth seeking individuals as a point of departure in critical human security studies How does reconstruction bind post war and post disaster states and societies into the global capitalist democratic political structure

Religion, Identity and Human Security Giorgio Shani, 2014-04-03 Religion Identity and Human Security seeks to demonstrate that a major source of human insecurity comes from the failure of states around the world to recognize the increasing cultural diversity of their populations which has resulted from globalization Shani begins by setting out the theoretical foundations dealing with the transformative effects of globalization on identity violence and security The second part of the volume then draws on different cases of sites of human insecurity around the globe to develop these ideas examining themes such as securitization of religious symbols retreat from multiculturalism rise of exclusivist ethno religious identities post 9 11 state religion colonization and the racialization of migration Highlighting that religion can be a source of both human security and insecurity in a globalizing world Shani offers a critical human security paradigm that seeks to de secularize the individual by recognizing the culturally contested and embedded nature of human identities The work argues that religion serves an important role in re embedding individuals deracinated from their communities by neo liberal globalization and will be of interest to students of International Relations Security Studies and Religion and Politics

Critical Perspectives on Human Security David Chandler, Nik Hynek, 2010-09-13 This new book presents critical approaches towards Human Security which has become one of the key areas for policy and academic debate within Security

Studies and IR The Human Security paradigm has had considerable significance for academics policy makers and practitioners Under the rubric of Human Security security policy practices seem to have transformed their goals and approaches re prioritising economic and social welfare issues that were marginal to the state based geo political rivalries of the Cold War era Human Security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and shape the space within which security concerns inform international policy practices However in its wider use Human Security has become an amorphous and unclear political concept seen by some as progressive and radical and by others as tainted by association with the imposition of neo liberal practices and values on non Western spaces or as legitimizing attacks on Iraq and Afghanistan This book is concerned with critical perspectives towards Human Security highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise Human Security within frameworks of emancipatory possibility and those which attempt to deconstruct Human Security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power The chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security This book will be of great interest to students of human security studies and critical security studies war and conflict studies and international relations

Globalization and Human Security Paul Battersby, Joseph M. Siracusa, 2009-03-16 This concise text presents a focused well rounded and clear eyed introduction to the concept of human security Questioning the utility of traditional national security frameworks in the postDCold War era Paul Battersby and Joseph Siracusa argue that we must urgently reconsider the principle of state sovereignty in a global world where threats to humanity are beyond the capacity of any one nation to address through unilateral action A welcome alternative to state centric approaches to security this balanced book will be a valuable supplement for courses in international and national security

Gendering Human Security in Afghanistan Ben Walter, 2017-06-14 This book employs the concept of human security to show what the term means from the perspective of women in Afghanistan It engages with a well established debate in academic and policy making contexts regarding the utility of human security as a framework for understanding and redressing conflict The book argues that this concept allows the possibility of articulating the substantive experiences of violence and marginalisation experienced by people in local settings as well as their own struggles towards a secure and happy life In this regard it goes a long way to making sense of the complex dynamics of conflict which have confounded Western policy makers in their ongoing state building mission in Afghanistan However despite this inherent potential the idea of human security still needs refinement Crucially it has benefitted from critical feminist and critical social theories which provide the conceptual and methodological depth necessary to apprehend what a progressive ethical program of security looks like and how it can be furthered Using this framework the work provides a critical reconstruction of the effect of the US led Western Intervention on women s experiences of insecurity in the three provincial contexts of Nangarhar Bamiyan and Kabul This reconstruction is drawn from a wealth of historical and contemporary sociological research alongside original fieldwork undertaken in Delhi India during 2011 with women and men from the country s different communities This book will be of much interest to students of human security state building gender politics war and conflict studies and IR in general

Rutazibwa, Robbie Shilliam, 2018-02-21 Engagements with the postcolonial world by International Relations scholars have grown significantly in recent years The Routledge Handbook of Postcolonial Politics provides a solid reference point for understanding and analyzing global politics from a perspective sensitive to the multiple legacies of colonial and imperial rule The Handbook introduces and develops cutting edge analytical frameworks that draw on Black decolonial feminist indigenous Marxist and postcolonial thought as well as a multitude of intellectual traditions from across the globe Alongside empirical issue areas that remain crucial to assessing the impact of European and Western colonialism on global politics the book introduces new issue areas that have arisen due to the mutating structures of colonial and imperial rule This vital resource is split into five thematic sections each featuring a brief orienting introduction Points of departure Popular postcolonial imaginaries Struggles over the postcolonial state Struggles over land Alternative global imaginaries Providing both a consolidated understanding of the field as it is and setting an expansive and dynamic research agenda for the future this handbook is essential reading for students and scholars of International Relations alike **Semiotics of Happiness** Ashley Frawley, 2015-02-26 The Semiotics of Happiness examines the rise of happiness and its various satellite terminologies as a social and political semiotic exploring its origins in the US and subsequent spread into the UK and across the globe The research takes as its starting point the development of discussions about happiness in UK newspapers in which dedicated advocates began to claim that a new science of happiness had been discovered and argued for social and political change on its behalf Through an in depth analysis of the written and visual rhetoric and subsequent activities of these influential claims makers Frawley argues that happiness became a serious political issue not because of a growing unhappiness in society nor a demand on the ground for new knowledge about it but rather because influential and dedicated insiders took the issue on at a cultural moment when problems cast in emotional terms were particularly likely to make an impact Emerging from the analysis is the observation that while apparently positive and light hearted the concern with happiness implicitly affirms a vulnerability model of human functioning encourages a morality of low expectations and in spite of the radical language used to describe it is ultimately conservative and ideally suited to an era of no alternative to capitalism **Security and Crime** Alison Wakefield, 2021-06-09 Security and Crime is an authoritative and multidisciplinary analysis of the relationship between security and crime addressing much of the confusion about its nature and meaning clarifying its relevance to criminological analysis and giving due attention to the interdisciplinary nature of the topic Providing an historical and prospective look at issues within security the book will trace the development of security across disciplines situate this contested concept within criminological discourse and concerns explore the rising attention in politics and academic scholarship to security issues as

Recognition, Conflict and the Problem of Global Ethical Community Shannon Brincat, 2017-10-02 Recognition is a fundamental aspect of all social interactions between individuals groups local communities and sovereign states Recognition refers to those sociological processes whereby two or more entities such as states groups such as ethnic or cultural communities or individuals interact with one another and come to understand themselves and the other as mutually free individuals as social agents whose identities interests and outlooks are equally bound together Without the foundational act of recognition relations can become unequal and antagonistic leading to social pathologies denigration and even open conflict This volume brings together leading international scholars of recognition theory in world politics to discuss the potential for recognition to pacify relations between states groups and individuals and to develop recognition processes in the global community It examines the implications of recognition theory in helping to understand the problem of conflict and the possibilities for forging a form of global ethical community This book was published as a special issue of Global Discourse

Transforming World Politics Anna M. Agathangelou, L.H.M. Ling, 2009-06-02 This book provides a critical understanding of contemporary world politics by arguing that the neoliberal approach to international relations seduces many of us into investing our lives in projects of power and alienation These projects offer few options for emancipation consequently many feel they have little choice but to retaliate against violence with more violence The authors of this pioneering work articulate worldism as an alternative approach to world politics It intertwines non Western and Western traditions by drawing on Marxist postcolonial feminist and critical security approaches with Greek and Chinese theories of politics broadly defined The authors contend that contemporary world politics cannot be understood outside the legacies of these multiple worlds including axes of power configured by gender race class and nationality which are themselves linked to earlier histories of colonizations and their contemporary formations With fiction and poetry as exploratory methods the authors build on their multiple worlds approach to consider different sites of world politics arguing that a truly emancipatory understanding of world politics requires more than just a shift in ways of thinking above all it requires a shift in ways of being Transforming World Politics will be of vital interest to students and scholars of International Relations Political Science Postcolonial Studies Social Theory Women's Studies Asian Studies European Union and Mediterranean Studies and Security Studies

Violence against Women in and beyond Conflict Julia Carolin Sachseder, 2022-09-16 Violence against Women in and beyond Conflict explores the processes and structures that underlie and contribute to sexual violence and internal displacement in armed conflict utilizing extensive

ethnographic research to provide cutting edge insights The author argues that the key to understanding violence against women lies at the intersection of transnational capital race and gender that not only contribute to its production but also to its persistence The book uses the Colombian armed conflict as the primary case study but develops a broader framework for theorizing the relationship between the global political economy the history of coloniality and intersectional constructions of gender and race with regard to conflict and violence It offers an understanding of violence against women as not isolated from but part and a symptom of a larger system of political social and economic inequality that is rooted in colonialism and exploited and exacerbated by transnational capital relations The author also shows how the state and non state actors most prominently paramilitaries are involved in this relationship of violence The book highlights implications for meaningful and sustainable peace in post conflict contexts This book will be of great interest to students and scholars of international relations gender studies and conflict studies as well as policymakers non governmental organizations and practitioners interested in conflict and security
