Glock 23 Owners Manual:

Glock Paul M. Barrett, 2013-01-15 The Glock pistol is America's Gun. It has been rhapsodized by hip hop artists and coveted by cops and crooks alike. Created in 1982 by Gaston Glock, the pistol arrived in America at a fortuitous time. Law enforcement agencies had concluded that their agents and officers armed with standard six round revolvers were getting outgunned by drug dealers with semi-automatic pistols; they needed a new gun. With its lightweight plastic frame and large capacity spring action magazine, the Glock was the gun of the future. You could drop it underwater, toss it from a helicopter or leave it out in the snow and it would still fire. It was reliable, accurate, lightweight and cheaper to produce than Smith and Wesson's revolver. Filled with corporate intrigue, political maneuvering, Hollywood glitz, bloody shoot outs and an attempt on Gaston Glock's life by a former lieutenant, Glock is not only the inside account of how Glock the company went about marketing its pistol to police agencies and later the public, but also a compelling chronicle of the evolution of gun culture in America.

Field & Stream, 1991-08 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories, compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

The Application of Hydraulic and Sediment Transport Models in Fluvial Geomorphology Artur Radecki-Pawlik, Tomáš Galia, 2020-12-10 After publishing the famous *Fluvial Processes in Geomorphology* in the early 1960s, the work of Luna Leopold, Gordon Wolman and John Miller became a key for opening the door to understanding rivers and streams. They first illustrated the problem to geomorphologists and geographers. Later, Chang in his *Fluvial Processes in River Engineering* provided a basis for engineers, showing this group of professionals how to deal with rivers and how to understand them. Since then, more informative studies have been published. Many of the authors started to combine fluvial geomorphology knowledge and river engineering needs, such as *Tools in Fluvial Geomorphology* by G. Mathias Kondolf and Hervé Piégay, or focused more on river engineering tasks, such as *Stream Restoration in Dynamic Fluvial Systems: Scientific Approaches* by Andrew Simon, Sean Bennett and Janine Castro. Finally, Luna Leopold summarized river and stream morphologies in the beautiful *A View of the River*. It appears that we continue to explore this subject in the right direction. We better understand rivers and streams and, as engineers and fluvial geomorphologists, we can establish tools to help bring rivers alive. However, there is still a hunger for more scientific tools that we could use to further understand rivers and to support the development of healthy streams and rivers with high biodiversity in the present.
