Going Public Public Architecture Urbanism And Interventions:

Going Public Robert Klanten, S. Ehmann, 2012 *Going Public* showcases the creative revival of public space in our urban and rural landscapes. The book's compelling selection of formal and informal interventions, reclamations and architecture illustrates the current scope and interest in refashioning and repurposing our built environment for public use. The objectives of the featured examples are as diverse as the projects themselves and range from inspiring communication and community experience to devising new means of gathering in and connecting to nature. Ranging from bold to subtle and from temporary to permanent, the architecture and urban design featured in *Going Public* offers inspiring and surprising interpretations of our public surroundings and natural landscapes.

Arts in Place Cara Courage, 2017-02-03 This interdisciplinary book explores the role of art in placemaking in urban environments, analysing how artists and communities use arts to improve their quality of life. It explores the concept of social practice placemaking where artists and community members are seen as equal experts in the process. Drawing on examples of local level projects from the USA and Europe, the book explores the impact of these projects on the people involved, on their relationship to the place around them, and on city policy and planning practice. Case studies include Art Tunnel Smithfield Dublin, an outdoor art gallery and community space in an impoverished area of the city; The Drawing Shed London, a contemporary arts practice operating in housing estates and parks in Walthamstow; and Big Car Indianapolis, an arts organisation operating across the whole of this Midwest city. This book offers a timely contribution bridging the gap between cultural studies and placemaking. It will be of interest to scholars, students and practitioners working in geography, urban studies, architecture, planning, sociology, cultural studies and the arts.

Reinventing Eastern Europe: Imaginaries, Identities and Transformations Evinc Doğan, 2019-01-22 This edited collection brings together a wide range of topics that shed light on the social, cultural, economic, political and spatio-temporal changes influencing post-socialist cities of Eastern Europe. Different case studies are presented through papers that were presented at the Euroacademia International Conference series. Imaginaries, identities and transformations represent three blocks for understanding the ways in which visual narratives, memory and identity and processes of alterity shape the symbolic meanings articulated and inscribed upon post-socialist cities. As such, this book stimulates a debate in order to provide alternative views on the dynamics, persistence and change broadly shaping mental mappings of Eastern Europe. The volume offers an opportunity for scholars, activists and practitioners to identify, discuss and debate the multiple dimensions in which specific narratives of alterity making towards Eastern Europe preserve their salience today in refurbished and refashioned manners.

The Routledge Handbook of Place Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26 The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars, providing a comprehensive yet cutting-edge overview of theories, concepts and creative engagements with place that resonate with contemporary concerns and debates. Contested Spaces Concerted Projects Cristina F. Colombo, Jacopo Leveratto, 2022-05-18 European cultural heritage is inherently complex and layered In the past conflicting or controversial perspectives on different historical memories and experiences have been colliding in the rich cultural landscape of Europe and continue to do so in the present Contemporary projects of re activation of contentious spaces seem to challenge both the traditional design parameters and the role of spatial practitioners They require new strategies that effectively mix top down and bottom up impulses through a new design approach that is still in search of a clear definition *Contested Spaces Concerted Projects* collects the stories of some selected cases of difficult built heritage in order to highlight the most innovative methodologies of re activation by which architects artists designers and collectives have developed new participatory public interfaces
