Fire Point is the sixth novel in the bestselling Ryan Lock series. Ryan Lock and Ty Johnson are in Los Angeles and on the trail of a deadly cult who are planning on taking their unique message to the world in the most devastating fashion imaginable. This series is ace. There are deservedly strong Lee Child comparisons as the author is also a Brit; his novels are US based, his character appealing, and his publisher the same, Sarah Broadhurst. The Bookseller: This is a writer and a hero to watch. The Daily Mail: Sean Black writes with the pace of Lee Child and the heart of Harlan Coben. New York Times Bestseller Joseph Finder: Like Lee Child's Jack Reacher, Lock is an ex-military policeman. Unlike Reacher, he has a job as an elite bodyguard, a home, friends, and a sense of humour. Lock's likeability contrasts with Reacher's pomposity, and Black's style is supremely slick. The Daily Telegraph

The American Architect and Building News, 1884 Safe: How to stay safe in a dangerous world Chris Ryan, 2017-10-19

In today's increasingly hostile climate, people are anxious about how to keep themselves safe. Chris Ryan served in the SAS for seven years and in several war zones throughout the world. During this time, he was the Regiment's top striker, and in 1991 during the infamous Bravo Two Zero mission behind Iraqi lines, he was the only member of the team to evade capture and fight his way to safety, for which he was awarded the Military Medal. His CO said he had made Regiment history. He is the author of bestselling fiction based on his own experiences and is an expert in dangerous situations. Here he tells you how to keep yourself and your family safe from the perils of modern urban life. He leads you through a variety of situations, including what to do if you are walking down the street and think you are being followed, you find yourself confronted by a threatening group of people or a gang, you find yourself caught in the middle of a riot, you hear gunfire or explosions in a crowded place, e.g. shopping centre, you hear on the radio that Russia has launched nuclear missiles that will land in the centre of London in two hours.

Official Gazette of the United States Patent Office, United States Patent Office, 1884 Ghost Guns Mark A. Tallman, 2020-08-13

With thorough analysis and balanced reporting, *Ghost Guns: Hobbyists, Hackers, and the Homemade Weapons Revolution* is an essential resource for readers seeking to understand the rise of homemade firearms and future options for managing them. For more than a century, strict gun control was possible because firearms were produced in centralized industrial factories. Today, the Fourth Industrial Revolution, combining old and new technologies, threatens to upend this arrangement. An increasing number of hobbyists, makers, technology provocateurs, and sophisticated criminals are proving that you don't need a factory to make guns anymore. The security challenges of this transformation are increasingly apparent, but the technologies behind it hold tremendous potential, and while ignoring the security implications would entail risks, the costs of new policies also must be evaluated. Do it yourself or DIY weapons will bring significant ramifications for First and Second Amendment law, international and homeland security, crime control, technology, privacy, innovation, and the character of open source culture itself. How can a liberal society adjust to technologies that make it easier to produce weapons and contraband? Informative and thought-provoking, *Ghost Guns: Hobbyists, Hackers, and the Homemade Weapons Revolution* carefully analyzes the technical, legal, social, political, and criminological trends.
