Szabo, 2014-12-18 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Having emerged from the end of the Cold War as a unified country Germany has quickly become the second largest exporter in the world Its economic might has made it the center of the Eurozone and the pivotal power of Europe Like other geo economic powers Germany's foreign policy is characterized by a definition of the national interest in economic terms and the elevation of economic interests over non economic values such as human rights or democracy promotion This strategic paradigm is evident in German's relationship with China the Gulf States and Europe but it is most important in regard to its evolving policies towards Russia In this book Stephen F Szabo provides a description and analysis of German policy towards Russia revealing how unified Germany is finding its global role in which its interests do not always coincide with the United States or its European partners He explores the role of German business and finance in the shaping of foreign policy and investigates how Germany's Russia policy affects its broader foreign policy in the region and at how it is perceived by key outside players such as the United States Poland and the EU With reference to public opinion the media and think tanks Szabo reveals how Germans perceive Russians and he uncovers the ways in which its dealings with Russia affect Germany in terms of the importing of corruption and crime Drawing on interviews with key opinion shapers business and financial players and policy makers and on a wide variety of public opinion surveys media reports and archival sources his will be a key resource for all those wishing to understand the new geo economic balance of Europe

Geo-economics and Power Politics in the 21st Century Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06 Starting from the key concept of geo economics this book investigates the

new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran's nuclear programme or Russia's annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the economic binds that are decisive in today's globalised and highly interconnected world Indeed as the volume shows the ability to wield economic power forms an essential means in the foreign policies of major powers In so doing the book challenges simplistic accounts of a return to traditional military driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations As such it advances our understanding of geo economics as a strategic practice and as an innovative and timely analytical approach This book will be of much interest to students of security studies international political economy foreign policy and International Relations in general

The Bridge Thane Gustafson, 2020-01-07 A Marginal Revolution Best Book of the Year Winner of the Shulman Book Prize A noted expert on Russian energy argues that despite Europe's geopolitical rivalries natural gas and deals based on it unite Europe's nations in mutual self interest Three decades after the fall of the Berlin Wall and the breakup of the Soviet empire the West faces a new era of East West tensions Any vision of a modern Russia integrated into the world economy and aligned in peaceful partnership with a reunited Europe has abruptly vanished Two opposing narratives vie to explain the strategic future of Europe one geopolitical and one economic and both center on the same resource natural gas In *The Bridge* Thane Gustafson an expert on Russian oil and gas argues that the political rivalries that capture the lion's share of media attention must be viewed alongside multiple business interests and differences in economic ideologies With a dense network of pipelines linking Europe and Russia natural gas serves as a bridge that unites the region through common interests Tracking the economic and political role of natural gas through several countries Russia and Ukraine the United Kingdom Germany the Netherlands and Norway *The Bridge* details both its history and its likely future As Gustafson suggests there are reasons for optimism but whether the gas bridge can ultimately survive mounting geopolitical tensions and environmental challenges remains to be seen

Corporate Crime and Punishment Cornelia Woll, 2023-10-31 Over the last decade many of the world's biggest companies have been embroiled in legal disputes over corruption fraud environmental damage taxation issues or sanction violations ending either in convictions or settlements of record breaking fines that have surpassed the billion dollar mark For critics of globalisation this turn towards corporate accountability is a welcome change showing that multinational companies are not above the law In this book Cornelia Woll considers how far this turn toward negotiated corporate justice and the United States legal action against multinationals in particular is motivated by geopolitical and

geoeconomic concerns Woll analyses the evolution of corporate criminal prosecutions in the United States as well as the extraterritorial expansion of its jurisdictions and demonstrates a notable bias against foreign firms In extreme cases she argues this type of legal action is used for explicitly strategic purposes to further US economic interests at home and abroad a practice known as economic lawfare By studying the recent institutional and legal changes within a range of countries that have seen their multinational companies targeted by the threat of US prosecutions including the United Kingdom Germany Canada and Brazil Woll draws attention to the impact of this strategy in reshaping both national legal approaches to corporate criminal law and the protocols for business government relations No government wishes to stand accused of allowing their own multinationals to get away with illegal or unethical practices that have only come to light via US investigations nor do they wish to see the resulting fines from any legal proceedings paid out to the US justice system alone Woll discusses the resulting measures taken and those still needed to strengthen national capacity to intervene in corporate misconduct cases and considers the extent to which certain US actions exemplify the weaponisation of interdependence by a hegemonic power
