Week	Unit and Topic	Item Completed
Operations and Algebraic Thinking Solve real-world problems with whole numbers and whole problems.		
1	Represent a multiplicative equation and comparison, e.g., interpret $56 = 8 \times 7$ as a statement that 56 is 8 times as many as 7 and 7 times as many as 8. Represent word problems of multiplicative comparison as multiplicative equations.	
2	Model a division word problem involving multiplicative comparison, e.g., for any two quantities, represent the relationship between the two quantities as a multiplication equation.	
3-4	Identify patterns and patterns generated with whole numbers and finding whole number patterns using the four operations, including patterns in which successive terms are multiplied. Represent these patterns using equations with a whole number for the unknown quantity. Record the successive values of a pattern using mental computation and estimation strategies, including rounding.	
Number and Operations in Base Ten Develop place value understanding for multi-digit numbers.		
5-6	Recognize that in a multi-digit whole number, a digit is one place (ten times) less than what it represents in the place to its right. For example, recognize that 700 in 742 is 10 times as much as 70 and 100 times as much as 7.	
Number and Operations: Fractions Build understanding of fraction equivalence and ordering.		
7	Explain why a fraction is less than, equal to, or greater than another fraction by using visual models. Add attention to how the numerator and denominator affect the size of the fraction. Use number lines to compare two fractions. Use the symbols $<$, $=$, and $>$ to compare two fractions.
