#### Unnatural States

Peter Ian Lomas, 2017-09-08 Unnatural States is a radical critique of international theory in particular of the assumption of state agency that states act in the world in their own right Peter Lomas argues that since the universal states system is inequitable and rigid and not all states are democracies anyway this assumption is unreal and to adopt it means reinforcing an unjust status quo Looking at the concepts of state nation and agency Lomas sees populations struggling to find an agreed model of the state owing to inherited material differences and unsurprisingly among theorists of the nation only controversy and a great confusion of terms Meanwhile the functional incarnations of the state agent are caricatures the mandarin state the lawyer state the landlord state the heir to history state and the patriot state Yet recent developments in international theory constructivism scientific realism postmodernism sacrifice state agency only at the price of an unhelpful abstraction The states system is dysfunctional and obsolete Lomas contends and international theory must be recast with morality as central to inspire and to guide historic change He focuses in his conclusion on prescriptions for change led by four moral concerns human rights weapons of mass destruction relations between rich and poor societies and the environment I begin this book

writes Lomas with the commonest commonplace of international theory to expose it as a meaningless cliché. In the masterly hands of Hobbes it was elaborated into a shock formula for organized society: a reading of history as civilization's failure. Kant sought to rescue morality from Hobbes and create the structures of modernity, but Kant's influence is coming to an end. In the Cold War, politicians disagreeing over another philosopher almost brought the world to an end. Hence the challenges of our time. These are primary and profound. Philosophers have done much to define the modern world. The point of international theory is to change it.

*Latin America And The Caribbean In The International System* G. Pope Atkins, 2018-02-06. The fourth edition of this widely praised text has been thoroughly revised to reflect the evolving characteristics of the current international system that have had a dramatic effect on every aspect of international relations of Latin America and the Caribbean. The original purpose of this book is unchanged. It continues to provide a topically current and analytically integrated survey of the region's role in the world. Still organized around the idea of Latin America and the Caribbean as a separate subsystem within the global international system, the discussion gives special emphasis to complex interstate and transnational structures and processes. Within this framework, Atkins analyzes the foreign policies of the Latin American states themselves and those of the United States and other countries toward Latin America and the Caribbean. He also looks closely at the nature and role of transnational actors in the region, such as the multinational corporations, the Holy See, Protestant Churches, transnational political parties, international labor, nongovernmental organizations, and others. He gives special attention to Latin American participation in international institutions at all levels.

Global Politics as If People Mattered Mary Ann Tétreault, Ronnie D. Lipschutz, 2005. Global politics because people matter. People, households, and the world. People and power. People and economy. People and states. People and borders. People and war. People and justice. People and globalization. People matter.

Marxism and World Politics Alexander Anievas, 2012-07-26. This book brings together internationally distinguished scholars from History, Philosophy, Development Studies, Geography, and International Relations (IR) to examine recent developments in Marxist approaches to world politics. Offering original and stimulating analyses of subjects traditionally at the forefront of Marxist studies of world politics, the collection also considers issues which have yet to be fully explored within a number of disciplines. Examining a wide array of topics ranging from the imperialism/globalization debate, the connections between social structures and foreign relations, the role of identity and imperialist norms in world politics, to the relationship between Marxist and Realist IR Theory, the contributors seek to further theoretical discussions and their implications for emancipatory radical politics. These contributions are structured around two major themes: The relationship between capitalist modernity and the states system in explaining the changing patterns of inter-state conflict and cooperation; The debates within Marxist and IR discourses on the theoretical significance of the international, covering topics including uneven and combined development and passive revolution.
