## **Glock 22 Instruction Manual 2013:**

**Glock** Paul M. Barrett, 2013-01-15 The Glock pistol is America's Gun. It has been rhapsodized by hip hop artists and coveted by cops and crooks alike. Created in 1982 by Gaston Glock, the pistol arrived in America at a fortuitous time. Law enforcement agencies had concluded that their agents and officers armed with standard six round revolvers were getting outgunned by drug dealers with semi-automatic pistols; they needed a new gun. With its lightweight plastic frame and large capacity spring action magazine, the Glock was the gun of the future. You could drop it underwater, toss it from a helicopter or leave it out in the snow and it would still fire. It was reliable, accurate, lightweight and cheaper to produce than Smith and Wesson's revolver. Filled with corporate intrigue, political maneuvering, Hollywood glitz, bloody shoot outs and an attempt on Gaston Glock's life by a former lieutenant, Glock is not only the inside account of how Glock, the company, went about marketing its pistol to police agencies and later the public, but also a compelling chronicle of the evolution of gun culture in America.

**Virtual Reality in Manual Order Picking** Jan-Karl Knigge, 2021-08-30 The introduction of consumer level head mounted devices (HMDs) has led to a major drop in the application costs of virtual reality (VR), making the technology available for a wide range of users. To understand if VR HMDs can be used for planning and training in the context of manual order picking, this thesis provides the results of a large scale randomized controlled study in which order picking has been compared between a virtual and a real environment. The results imply that VR HMDs can indeed be used by manufacturers and warehouse operators in a rack planning process if the reduction of searching times or the perceived workload is in focus. Additionally, the findings enable the use of VR HMDs for scientific research on human centred rack design. Finally, the thesis highlights the usability of VR HMDs for training manual order picking activities.
