

RESISTANCE BAND

WHY USE RESISTANCE BANDS?

Resistance bands allow you to perform strength-training exercises without weights and enable you to complete a full-body workout. Using resistance bands adds variety and intensity to your strength-training exercises. As you work out, resistance is increased throughout the motion, resulting in more endurance and a broader range of motion. Resistance band training can also help you improve stamina and flexibility.

WHAT'S YOUR GOAL?

Increase Muscle Strength
Perform a series of 2-3 resistance exercises for 10-15 seconds between sets.

Increase Muscle Size
Perform a series of 2-3 resistance exercises for 10-15 seconds between sets.

Increase Muscular Endurance
Perform a series of 2-3 resistance exercises for 10-15 seconds between sets.

Squats

Place the resistance band securely under your feet and bring the handles up to chest level, with your arms bent and palms facing backward. Keep your chest up and bend your hips and knees into a squat position until your thighs are parallel to the ground. Rise slowly through your heels back to the start position.

Press-ups

Take a press-up position with the band running around your back and slowly lower your chest to the floor until your elbows reach a 90° angle. Contract your chest and triceps to push back up to the start position.

Chest Presses

Place the band around a solid structure, turn so you are facing away from the structure and place your feet shoulder width apart. Hold a handle in each hand at chest level, and with a forward movement press the handles away from your chest. Hold the position for a second and then slowly return to the start position.

Face Pulls

Place the band around a solid structure and stand facing the structure with your feet shoulder width apart. Hold a handle in each hand, fully extend your arms at chest level and pull the handles towards your face while keeping your elbows high. Hold the position for a second and then slowly return to the start position.

Shoulder Presses

Place the resistance band securely under your feet and bring your hands up to shoulder level, with your palms facing forward. Press the band above your head, hold this position for a second and then slowly bring your hands down to shoulder level.

Lateral Raises

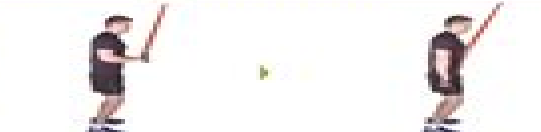

Place the resistance band securely under your feet and hold the handles by your sides, with your palms facing inward. Slightly bend your arms and then raise them out to your sides until they are parallel to the floor. Hold the position for a second and then slowly return to the start position.

Biceps Curl

Place the resistance band securely under your feet and hold the handles by your sides, with your palms facing forward. Contract your biceps, and then as your elbows go up you can pull the handles towards your chest. Hold the position for a second and then slowly return to the start position.

Triceps Pushdown

Place the band around a solid structure above you and stand facing the band. Hold the handles at chest level with your arms bent and palms facing down. Bend your elbows tucked into your side and press the handles forcefully towards the floor until your arms are fully extended. Hold the position for a second and then slowly return to the start position.

MAXIMISE YOUR WORKOUT!

Warm Up: Warm Up your muscles before starting any resistance training. This can be done by performing light cardio for 5-10 minutes, such as walking or jogging, or by performing dynamic stretching exercises.

Form: Proper form is essential for maximizing the effectiveness of your resistance training. Focus on maintaining a neutral spine, engaging your core, and using your feet to push against the band.

Progression: To continue to challenge your muscles, gradually increase the resistance of the band or the number of repetitions over time.

Rest: Allow your muscles to recover between workouts. Aim for at least one full day of rest between resistance training sessions.

Hydration: Stay hydrated throughout your workout. Drinking water before, during, and after your workout helps maintain fluid balance and supports muscle function.

Consistency: Consistency is key to seeing results. Aim to perform resistance training exercises at least 2-3 times per week.

Tracking: Keep a log of your workouts, including the exercises you performed, the resistance used, and the number of repetitions.

Listening to your body: Pay attention to any pain or discomfort during your workout. If you experience any pain, stop the exercise and consult a healthcare professional.

Goal setting: Set specific, measurable goals for your resistance training, such as increasing the number of repetitions or the resistance used.

Warm up: Warm up your muscles before starting any resistance training. This can be done by performing light cardio for 5-10 minutes, such as walking or jogging, or by performing dynamic stretching exercises.
