Vertical Envelopment Air Mobility Operations were de veloped by the German Army during WWII in the 1930 s The US Army
soon adopted this method of offensive operations in 1941 using wooden gliders The glider was assisted into the air by being
towed by a larger aircraft and then released The pilot had to navigate the large glider loaded with a team of infantry soldiers
to the landing zone behind enemy lines at night and attempt to land safely Once the pilot landed the glider he would join the
mission as another infantry soldier with the team that he flew in Although the gliders and techniques used were advanced for
that time period they did pose some disadvantages Once the aircraft was landed safely that team of soldiers were cut off from
allied troops Pilots had to be cross trained with infantry tactics so he could operate as both roles The air mobility glider was
abandoned after WWII after the invention of the helicopter PREFACE 1 November 2011 1 The Sabalauski Air Assault School
