Atlantic Region,1996 Prince Edward Island National Park is a narrow coastal strip on the Island s north shore established in 1937 as a recreational seaside park The purpose of the Park within Parks Canada s representative system plan is to protect an example of the Maritime Plain natural region in particular the coastal barrier beaches and dune systems The

agency's ability to protect the Park's resources is being inhibited by the popularity of the beaches as recreational destinations and the cumulative impact of visitor pressure. Park developments and Park practices threaten the sustainability of the Park ecosystem. This study addresses the concern over cumulative environmental impacts in the Park and includes an introduction on cumulative effects assessment, an extensive literature review, and assessment of cumulative effects of previous, current, and proposed developments in the Park. The significance of the impacts on key resources is discussed, and mitigation measures are suggested with regard to natural habitat, aquatic systems, flora, and fauna. Recommendations are made for preserving park habitat and establishing monitoring programs.
