Value of Information and Flexibility Martin J. Vilela, Gbenga F. Oluyemi, 2021-10-21 This book presents a consistent methodology for making decisions under uncertain conditions as is almost always the case Tools such as value of information and value of flexibility are explored as a means to make more complex and nuanced decisions The book develops the complete formalism for assessing the value of acquiring information with two novel approaches Firstly it integrates the fuzzy characteristics of data and secondly develops a methodology for assessing data acquisition actions that optimize the value of projects from a holistic perspective The book also discusses the formalism for including flexibility in the project decision assessment Practical examples of oil and gas related decision problems are included and discussed to facilitate the learning process This book provides valuable advice and case studies applicable to engineers researchers and graduate students particularly in the oil and gas industry and pharmaceutical industry

Time Series for Data Science Wayne A. Woodward, Bivin Philip Sadler, Stephen Robertson, 2022-08-01 Data Science students and practitioners want to find a forecast that works and don't want to be constrained to a single forecasting strategy Time Series for Data Science Analysis and Forecasting discusses techniques of ensemble modelling for combining information from several strategies Covering time series regression models exponential smoothing Holt Winters forecasting and Neural Networks It places a particular emphasis on classical ARMA and ARIMA models that is often lacking from other textbooks on the subject This book is an accessible guide that doesn't require a background in calculus to be engaging but does not shy away from deeper explanations of the techniques discussed Features Provides a thorough coverage and comparison of a wide array of time

series models and methods Exponential Smoothing Holt Winters ARMA and ARIMA deep learning models including RNNs LSTMs GRUs and ensemble models composed of combinations of these models Introduces the factor table representation of ARMA and ARIMA models This representation is not available in any other book at this level and is extremely useful in both practice and pedagogy Uses real world examples that can be readily found via web links from sources such as the US Bureau of Statistics Department of Transportation and the World Bank There is an accompanying R package that is easy to use and requires little or no previous R experience The package implements the wide variety of models and methods presented in the book and has tremendous pedagogical use
