How I Wish I Had Taught Maths: Reflections on research, conversations with experts, and 12 years of mistakes Craig Barton,2018-01-01 I genuinely believe I have never taught mathematics better and my students have never learned more I just wish I had known all of this twelve years ago Craig

Barton is one of the UK's most respected teachers of mathematics. In his remarkable new book he explains how he has delved into the world of academic research and emerged with a range of simple practical effective strategies that anyone can employ to save time and energy and have a positive impact on the long term learning and enjoyment of students. Craig presents the findings of over 100 books and research articles from the fields of Cognitive Science, Memory Psychology and Behavioural Economics together with the conversations he has had with world renowned educational experts on his Mr Barton Maths Podcast and subsequent experiments with my students and colleagues.

Exploring Education at Postgraduate Level Anne O'Grady, Vanessa Cottle, 2015-09-25 There is a growing demand for educational professionals to develop a more critical understanding of the key and emerging debates in education so that they can better meet the challenges and demands placed upon them. *Exploring Education at Postgraduate Level* represents a range of perspectives from educational experts to academic researchers and highlights the key issues surrounding contemporary education. Organised into three parts and drawing on key issues in education theory, policy and practice, the book considers areas such as SEN, evaluating learning, ESOL and gender. Featuring reflective questions, case studies and summaries of core ideas, the chapters include: Troublesome learning journey; Applying educational thinkers to contemporary educational practice; Values production through social and emotional learning; Policy research; In defence of ad hocery; We are all critically reflective now; The politics of critical reflection in higher education and in the work place; Developing critical thought about SEN; The refuge of relativism. Aimed at supporting students on Masters level courses, this accessible but critically provocative text is an essential resource for those wishing to develop a more critical understanding of the role, purpose and function of educational systems and practices.

The Place of Ethics in Science Education Amanda McCrory, Michael J. Reiss, 2023-08-24 Science education, particularly school science education, has long had an uneasy relationship with ethics, being unsure whether to embrace ethics or leave it to others. In this book, the authors argue that while the methods of science and of ethics are very different, ethics plays a key role in how science is undertaken and used. And so ethics has a central place in science education, whether we are talking of school science education for students of all ages or the informal science education that takes place in through internet, books, magazines, TV and radio or in places such as hospitals and zoos. Written for science educators based in schools and elsewhere, the authors make no assumptions that the reader has any knowledge of ethics beyond the background understandings of morality that virtually all of us have. Empowered with the knowledge shared in this book, readers will feel confident about the place that ethics has in science education. The authors provide a rich array of examples as to how science education, both in school and out of school and for all ages, can be enhanced through including teaching about ethics.

Educational Research and Innovation: Developing Minds in the Digital Age Towards a Science of Learning for 21st Century Education Kuhl Patricia K., Lim Soo-Siang, Guerriero Sonia, Van Damme Dirk, 2019-04-10 This book highlights new scientific research about how people learn, including interdisciplinary perspectives from neuroscience.
