Introduction: The MATLAB Command Interface

MATLAB is basically just a really complicated program that functions as an extremely powerful calculator. As such, it can perform tasks that most calculators cannot, usually in fractions of a second. Never underestimate how irritatingly picky MATLAB can be about small sections of code. These are important to learn because they make up a large part of the terminology used in the course.

The Command Window:

Although you'd imagine it must play a very important role in writing codes, it is actually pretty much useless. If you use the command window to run multiple lines of code sequentially and
