Computer Tools for Electrical Engineers; Matlab & Spice James C. Squire, P.E., Ph.D., Julie Phillips Brown, Ph.D., 2019-03-08 Computer Tools for Electrical Engineers MATLAB SPICE is designed to meet the specific needs of electrical and computer engineering undergraduates with little or no prior experience with programming and matrix algebra Computer Tools focuses on the use of MATLAB within an electrical and computer engineering curriculum and it concludes with circuit simulation using the freely available application LTspice by Analog Devices The text emphasizes the development of practical skills that students will use in future EE and ECE coursework with programming chapters practical examples and problem sets that address common electrical engineering concerns The design of Computer Tools also draws upon the authors extensive involvement in pedagogical research writing and active learning strategies

Programming for Electrical Engineers James C. Squire, Julie Phillips Brown, 2020-07-08 Programming for Electrical Engineers MATLAB and Spice introduces beginning engineering students to programming in Matlab and Spice through engaged problem based learning and dedicated electrical and computer engineering content The book draws its problems and examples specifically from electrical and computer engineering covering such topics as circuit analysis signal processing and filter design It teaches relevant computational techniques in the context of solving common problems in electrical and computer engineering including mesh and nodal analysis Fourier transforms and phasor analysis Programming for Electrical Engineers MATLAB and Spice is unique among MATLAB textbooks for its dual focus on introductory level learning and discipline specific content in electrical and computer engineering No other textbook on the market currently targets this audience with the same attention to discipline specific content and engaged learning practices Although it is primarily an introduction to programming in MATLAB the book also has a chapter on circuit simulation using Spice and it includes materials required by ABET Accreditation reviews such as information on ethics professional development and lifelong learning Discipline specific Introduces Electrical and Computer Engineering specific topics such as phasor analysis and complex exponentials that are not covered in generic engineering Matlab texts Accessible Pedagogically appropriate for freshmen and sophomores with little or no prior programming experience Scaffolded content Addresses both script and functions but emphasizes the use of functions since scripts with non scoped variables are less commonly encountered after introductory courses Problem centric Introduces MATLAB commands as needed to solve progressively more complex EE ECE specific problems and includes over 100 embedded in chapter questions to check comprehension in stages and support active learning exercises in the classroom Enrichment callouts Pro Tip callouts cover common ABET topics such as ethics and professional development and Digging Deeper callouts provide optional more detailed material for interested students
